Please find enclosed a record of the meeting notice postings, minutes of the meetings, and Resolution R 2010-001 with signatures of the District Committee Members present, and record of their vote.

RESOLUTION R2010-001 TO ADOPT DESIRED FUTURE CONDITIONS

FOR AQUIFER(S) IN GROUNDWATER MANAGEMENT AREA 16

THE STATE OF TEXAS

GROUNDWATER MANAGEMENT AREA 16

GROUNDWATER CONSERVATION DISTRICTS

WHEREAS, Texas Water Code 36.108 requires the groundwater conservation districts located in whole or in part in a groundwater management area ("GMA") designated by the Texas Water Development Board to adopt desired future conditions for the relevant aquifers located within the management area;

WHEREAS, the groundwater conservation districts located wholly or partially within Groundwater Management Area 16 ("GMA 16"), as designated by the Texas Water Development Board, as of the date of this resolution are as follows: Bee GCD, Brush County GCD, Live Oak UWCD, McMullen GCD, Kenedy County GCD, Corpus Christi Aquifer Storage and Recovery Conservation District, San Patricio County GCD, Starr County GCD, Duval County GCD, and Red Sands GCD (collectively hereinafter "the GMA 16 Districts");

WHEREAS, the GMA 16 Districts are each governmental agencies and bodies politic operating under Chapter 36, Water Code;

WHEREAS, the GMA 16 Districts desire to fulfill the requirements of Texas Water Code 36.108 through mutual cooperation and joint planning efforts;

WHEREAS, the GMA 16 Districts have held numerous public meetings at which they have engaged in joint planning efforts to promote more comprehensive management of the aquifers located in whole or in part in Groundwater Management Area 16;

WHEREAS, the GMA 16 Districts recognize that GMA 16 includes a geographically and hydrologically diverse area with a variety of land uses and a diverse mix of water users;

WHEREAS, the GMA 16 Districts have considered the relevant aquifers, subdivisions thereof, and geologic strata located in whole or in part within the boundaries of GMA 16, and have further considered the hydrogeologic characteristics of the same, as well as the various uses and users of groundwater produced from such aquifers, subdivisions, and strata;

WHEREAS, the GMA 16 Districts held a meeting, which was open to the public and public comment was received, on August 30, 2010 at 1:00 PM in the Blue Room of Sam Fore Hall at Texas A&M University- Kingsville located at 700 University Blvd., Kingsville, TX 78363;

WHEREAS, notice of said August 30, 2010, meeting was properly given by each and all of the GMA 16 Districts in accordance with Chapter 36, Water Code, and Chapter 551, Government Code, and a true and correct copy of each of the notices has been attached hereto in Appendix A and is incorporated herein for all purposes;

WHEREAS, it is the intent and purpose of the GMA 16 Districts by adoption of this resolution to fulfill the requirements of Texas Water Code 36.108, including establishing "desired future conditions for the relevant aquifers" within GMA 16 for the specific aquifer(s) and desired future conditions described below;

WHEREAS, Texas Water Code 36.108 requires adoption of desired future conditions for only the "relevant aquifers" located within the management area and because the Carrizo-Wilcox, and the Yegua-Jackson aquifer slivers are not used for non-exempt wells and are not anticipated to be used for non-exempt wells during the planning horizon, GMA 16 considers the aquifers to not be relevant for purposes of GMA 16 joint planning at this time;

WHEREAS, GMA 16 Districts agree to continue to work on the desired future conditions for the aquifer(s) set forth below and the Groundwater Availability Model ("GAM") created by the Texas Water Development Board for GMA 16 in the near future after the adoption of the desired future conditions for the aquifer(s) below and the September 1, 2010 statutory deadline;

WHEREAS, in establishing these desired future conditions for the aquifer(s) set forth below, the GMA 16 Districts have considered all of the criteria required by Chapter 36 of the Texas Water Code and other information including groundwater availability model runs prepared by the TWDB;

WHEREAS, in establishing these desired future conditions for the aquifer(s) set forth below, the GMA 16 Districts have considered the uses and conditions of the aquifer(s) in different geographic areas within GMA 16 and what the effects and impacts of adopting such desired future conditions will have upon the condition of the aquifer(s) and the uses and users of groundwater from the aquifer(s) both now and in the future;

WHEREAS, after considering such anticipated effects and impacts these desired future conditions will have on the aquifer(s), uses, and users of groundwater, and considering all of the other criteria required by Chapter 36 of the Texas Water Code, including without limitation the groundwater resource management duties and responsibilities of the GMA Districts individually and collectively, the GMA 16 Districts have adopted the desired future conditions for the aquifer(s) set forth below;

WHEREAS; In reference to GAM run 09-008, the committee has considered several scenarios during deliberation; and

WHEREAS, at said August 30, 2010, meeting, after a motion was duly made and seconded that the GMA 16 Districts adopt this resolution establishing desired future conditions for the Gulf Coast aquifer and declining to adopt a desired future condition for the aquifer slivers, the motion prevailed by the following vote:

9 Ayes, 0 Nays, 1 Absent, and 0 present not voting

A List of the votes by District is enclosed in Appendix B.

NOW, THEREFORE, BE IT RESOLVED BY THE AUTHORIZED VOTING REPRESENTATIVES OF THE GMA 16 DISTRICTS AS FOLLOWS:

- 1 The above recitals are true and correct.
- 2 The authorized voting representatives of the GMA 16 Districts hereby establish a desired future condition of the Gulf Coast aquifer of a GMA-wide average drawdown of approximately 94 feet through 2060 consistent with scenario 10 of GAM run 09-008 by the vote reflected in the above recitals.
- 3 The authorized voting representatives of the GMA 16 Districts hereby decline to establish a desired future condition of the Carrizo-Wilcox, and the Yegua-Jackson aquifer slivers, finding them to not be relevant for purposes of GMA 16 joint planning at this time by the vote reflected in the above recitals.
- 4 The GMA 16 Districts and their agents and representatives, individually and collectively, are further authorized to take any and all actions necessary to implement this resolution.
- 5 The desired future conditions of the aquifer adopted by the GMA 16 Districts and attached hereto shall be effective immediately and shall continue in effect until amended, superseded, or repealed.

Generic Content FAQ

Is this different from the Generic Content control I already saw in Edit Page?
No, it is exactly the same. Just that it is far easier to manage, sort and filter the separate items here.

I just created a new item here and it does not appear on any page in the site. Why is that?
Consider this as a warehouse of content items. In Pages you choose which of them to display on a particular page.

Why don't the changes I've just made to a content item appear on the page?
Because of the workflow cycle: Send for Approval, Approve/Decline, Publish.
