DATE: 8/16/2006 TIME: 3:42:06PM PAGE: 1 of

5

Agency code: 580 Agency name: Water Development Board

Since 1957, the Texas Water Development Board has been charged with addressing the state's water needs. It is the state's water planning and water project financing agency. The TWDB's main responsibilities are threefold: (1) collecting and disseminating water-related data; (2) assisting with regional water planning, and preparing the State Water Plan for the development of the state's water resources; and (3) administering cost-effective financial assistance programs for the construction of water supply, wastewater treatment, flood control and agricultural water conservation projects.

Texas is one the nation's fastest growing states. From 1950 to 2005, population in the state grew from about 8 million to nearly 23 million. According to projections, the number of people living in Texas will reach 33 million by 2030 and 45 million by 2060. Most growth is expected to occur in the Rio Grande region and in urban areas surrounding Dallas-Fort Worth, Houston, San Antonio and Austin.

Rapid growth combined with Texas' susceptibility to drought makes water supply a crucial issue. One of the most pressing concerns is whether existing water supplies will sustain economic and demographic growth, and provide ample water during times of drought. Inadequate water supplies would likely curtail economic activity in business and industries heavily reliant on water. Unreliable water supplies would not only have an immediate and real impact on business and industry, but they might also bias corporate decision makers against plant expansion or plant location in Texas. Thus, ensuring that Texas communities have abundant and dependable water supplies is crucial for the state's economic security. Since the drought of the mid-1990s, a number of actions have occurred to keep water issues in the forefront.

Senate Bill 1, passed by the 75th Legislature, changed the way Texas Plans for the future water needs of the state. State agencies, political subdivisions, and Regional Water Planning Groups have assumed increased responsibility for ensuring sufficient water supplies for the state.

In 2001, the 77th Texas Legislature enacted Senate Bill 2, creating new financial assistance programs designed to finance water supply projects recommended by the State Water Plan. This legislation also charged the TWDB with preparing an Infrastructure Financing Report that would address how political subdivisions would pay for needed water supply infrastructure.

In 2002, the TWDB issued the State Water Plan. It was followed shortly thereafter by a letter from Governor Rick Perry directing the TWDB to develop a recommendation for a demonstration seawater desalination project as one step toward securing an abundant water supply to meet Texas' future water supply needs. This was one element in Governor Perry's "Controlling Our Destiny" water plan.

In 2003, the 78th Texas Legislature enacted Senate Bill 1639 creating the Study Commission on Water for Environmental Flows to study ways to balance the growing demands for Texas' water resource and environmental concerns. Lieutenant Governor David Dewhurst and House Speaker Tom Craddick issued water-related interim charges to a growing number of water-related legislative committees.

The 78th Texas Legislature also adopted House Bill 1370 which was signed into law in May 2003. HB 1370 charged the TWDB to allocated \$1.5 million to "undertake or participate in research, feasibility and facility planning studies, investigations, and surveys as it considers necessary to further the development of cost-effective water supplies from seawater desalination in the state." The TWDB allocated the \$1.5 million for feasibility and regional facility planning studies (feasibility studies) to determine the technical and economic viability of proposed demonstration seawater desalination projects. This resulted in TWDB funding studies of the Lower Rio Grande Valley-Brownsville, Corpus Christi, and Freeport project proposals. In addition, the legislation charged TWDB with reporting biennially on the progress of seawater desalination activities in the state. In its 2004 Biennial Report on Seawater Desalination, the TWDB concluded that implementing seawater desalination in Texas is technically feasible. The construction and operation of large-scale demonstration facilities will create an effective precedent to guide the development of a new, drought-proof, and plentiful water supply. This report identified the need for financial assistance to realize the development of large-scale seawater desalination projects in Texas.

ADMINISTRATOR'S STATEMENT 80th Regular Session, Agency Submission, Version 1 Automated Budget and Evaluation System of Texas (ABEST)

Agency code:	580	Agency name: Water Development Board		
--------------	-----	--------------------------------------	--	--

The 78th Texas Legislature also created the Water Conservation Implementation Task Force (WCITF) via enactment of Senate Bill 1094. In 2004, the WCITF produced a report that included legislative policy recommendations, and a Best Management Practices (BMP) Guide.

In 2005, the Legislature considered, but ultimately did not pass, Senate Bill 3, which included many significant water policy changes including environmental flows, water rights permitting, water conservation (including land stewardship), expedited amendments to the regional water plans, historic use of water permits, changes to the Edwards Aquifer Authority, and creation of several groundwater conservation districts.

The TWDB will present to the 80th Texas Legislature in January 2007 a comprehensive State Water Plan that incorporates the approved Regional Water Plans illustrating the orderly development, management and conservation of water resources over the next 50 years as well as the preparation for and response to drought conditions so that sufficient water is available at a reasonable cost to ensure public health, safety and welfare and to further economic development and to protect the agricultural and natural resources of the entire state. The plan will also include policy recommendations.

The TWDB Fiscal Years 2008-2009 general revenue baseline appropriation request for operations and program funding (excluding debt service on bonds) is \$16.5 million less than the Fiscal Years 2000-2001 biennium appropriation. This is a 32.8% reduction in state appropriations, accumulating over four biennia for a growing number of water resources programs. This continued reduction further strains TWDB's resources and ultimately affects the delivery of products and services.

EDAP I – Administration

EDAP was created by the 71st Legislature. To date, EDAP has funded 85 projects with the initial bond funding of \$250 million and \$300 million in EPA grants. The majority of the funding has been spent, or committed to the 85 projects. Additional administrative funds are necessary to complete the program. Activities should be complete in FY09.

Municipal Water Conservation

This Exceptional Item Request for FY 08-09 would restore the TWDB's Municipal Water Conservation Programs to the previous GR funding and FTE levels of FY 04-05 (in addition to the federal funding that was not previously reduced), in order to meet statutory and rules requirements. Without restoration of funding, the state would no longer have a role in promoting municipal conservation.

Restoration of Drinking Water Match for Disadvantaged Communities

This request is to restore general revenue appropriation for the disadvantaged community program of the Drinking Water State Revolving Fund to allow maximum utilization of the disadvantaged communities program based on the estimated grants for FY08-09. This will enable disadvantaged communities to have more affordable clean drinking water.

Disadvantaged Rural Community Water and Wastewater

This request will fund a program to provide grant and loan financial assistance to small, rural communities. Stakeholders expressed concern regarding the lack of funding for this type of program. This would replace a similar program (Small Community Hardship) that had overwhelming response, reinforcing the concerns raised by the stakeholders.

EDAP I - Final Bond Issuance

\$12,010,917 remains of the \$250 million in bond authorization. We are requesting that the Legislature grant the TWDB permission to issue these bonds in FY08 and appropriate the GR needed for debt service in FY09. It is anticipated that approximately 2 new EDAP projects would be committed with these additional funds. The cost of administering these additional 2 projects would be absorbed with the LAR Exceptional Item for EDAP I - Administration.

ADMINISTRATOR'S STATEMENT

80th Regular Session, Agency Submission, Version I Automated Budget and Evaluation System of Texas (ABEST) DATE: 8/16/2006 TIME: 3:42:13PM PAGE: 3 of 5

Agency code:580Agency name:Water Development Board

TWDB requires additional resources to ensure implementation of Senate Bill 1763 passed during the 79th Legislative Session. Specifically, state assistance is required to provide technical guidance and assistance to the districts on evaluating desired future conditions and managed available groundwater and to support TWDB's role in the petition process. Therefore, TWDB needs additional staff to provide technical assistance, work with the districts to identify defendable desired future conditions and run groundwater availability models, assist with legal issues associated with groundwater management areas, including petitions against desired future conditions, conduct inventory of public water supply wells and ensure the quality of the groundwater database.

Environmental Flows

The requested funds would be used to complete most tasks for the priority instream flow segments by the 2010 deadline, and to update the studies of the major estuaries without compromising the study schedule for the minor estuaries. Without adequate funding, the Environmental Flow programs will not meet the needs and expectations of policy makers or stakeholders.

Restoration of General Revenue for Regional Planning

Restoration of General Revenue funds for Regional Water Planning will provide a reliable source of funding for an ongoing statutorily-required activity, the analyses required to make decisions on how the state's water supply needs will be met in the future. This funding is needed to allow local and regional groups to develop approaches and methodologies for planning with a level of certainty that the associated studies and analyses will be funded.

Restoration of StratMap General Revenue

This exceptional item seeks to restore General Revenue (GR) funds that have decreased due to statewide agency budget constraints. The budget reductions have both reduced funding for capital purchases through the program and necessitated the transfer of funds from other programs to StratMap. StratMap produced seven statewide datasets from 1998 through 2001. These were digital aerial photography, surface water, digital elevation models, elevation contours, transportation, soil surveys, and political boundaries. In fiscal year 2002 the program entered a maintenance phase, but GR has fallen by \$545,929. To keep the program viable, TWDB has budgeted additional appropriated receipts which leaves the program short of previous levels.

Water Data for Water Planning

A base level of surface water and groundwater monitoring is critical to policymakers and water managers in order to adequately monitor and manage the state's water resources. Information on the water resources is critical for meeting future needs and developing answers to important water resource issues. Currently, the state's real-time monitoring network is inadequate for assessing the state's surface and groundwater resources.

EDAP II - Statewide Program

The 79th legislature passed HB 467 that changed the definition of an affected county to any county that has an economically distressed area (further defined as an area having a median household income that is not greater than 75% of the median state household income). Essentially, those definition changes made the EDAP a statewide program. However, in spite of the fact that the program was enlarged by definition, not only was funding for it not enlarged, but appropriation for the expanded EDAP program was totally absent. This request for appropriations is based on the fiscal note initially attached to the legislation expanding the program. This request assumes no issuance of bonds to fund the program. Should a constitutional amendment be proposed next session for bonds to support the program, the estimated \$50 million/year (starting in FY09) funded through bond issuance would need to be requested as approximately \$4.4 million in debt service. This expanded program requires staff and associated operating funds to provide basic technical assistance, training, adequate customer service, and coordination activities associated with the program. Grants for Facility Planning efforts are also included in the request.

Restoration of Funding for Desalination Grants

This request for reinstatement of funding would enable TWDB to devote grant funding to continue pilot testing development of large scale seawater desalination facilities in Texas. The downward trend of desalination costs and the upward trend of technological advances is contributing to more efficient desalination projects. This could Page 3

ADMINISTRATOR'S STATEMENT

	500	A			
Agency cod	e: 580	Agency name: Water Develo	pment Board		

prove to be especially beneficial to smaller and rural communities.

Water Technology Demonstration Program

This appropriation would fund planning, design, construction and operation of demonstration facilities using new, cost-effective water-supply technologies in small-utility settings and focusing on: a) Demonstrating cost-effective technologies targeting compliance with new Safe Drinking Water Standards; and, b) Developing new water-supplies from impaired water resources including brackish groundwater, seawater, by-product water from oil and gas mining and reuse. The demonstration projects would be designed to maximize the educational and technology transfer value and to systematically inform the regional water planning process of the potential created by these new technologies. Demonstration projects are a particularly valuable tool to provide practical, geographically close examples of the use of technologies to help address new drinking water standards such as the Arsenic Rule.

Borderlands Information Center

The current Borderlands Information Center (BIC) is dependent upon grant funding to maintain its personnel and to fulfill its mission. These sources of funds make the BIC dependent upon other initiatives and unable to establish a consistent mission and service to address the dynamic issues associated with the border area. A consistent funding source will allow the establishment of central resource for documenting change and modeling future scenarios to support federal, state and local entities working in the border region. Furthermore, geographic databases would address many of the current needs of border programs required to track resources and make land management decisions. This incorporation of Mexican data is currently performed piecemeal and does not provide a coherent framework to plan on the Texas side of the Border. Establishing a central geographic data catalog and information center will support Health, Environmental, Infrastructure, Economic Development, Agriculture, Education, Emergency Response and Homeland Security issues. This in turns provides multi-agency coordination as required by HB925 and SB827.

Colonial Self Help Program

The Colonia Self-Help program provides grant assistance to grass roots initiatives in economically distressed areas. Residents, in exchange for grant assistance, volunteer to provide labor to construct the facilities and/or donate equipment, materials and supplies. During the 77th legislature the TWDB was given authority to award funding for self-help projects directly to non-profit organizations. Since then, the TWDB has committed \$213,794 to nine construction projects through the Colonia Self-Help program. Recently, Board staff received documentation that identified approximately \$1.5 million of need. In addition to this information, during the Board's stakeholders meeting (October 2005), comments specifically emphasized the need for these projects.

State Participation (Debt Service)

Each biennium the legislature authorizes the amount of bonds that can be issued for State Participation projects, and it appropriates the amount of general revenue needed to pay the debt service on the bonds. As financial assistance needs are identified for specific projects recommended through the State and Regional Water Planning process, additional funding may be necessary to implement large-scale regional projects. Several entities have expressed interest in pursuing state participation projects if the funding is available. Legislative authorization is requested to issue up to \$50 million in general obligation bonds in the FY2008-2009 biennium for State Participations of approximately \$4.25 million in the FY2008-2009 biennium for payment of debt service.

State Participation-Brownsville PUB-Desal Project (Debt Service)

This item is for debt service associated with additional bonds sold for the State Participation program specifically for the City of Brownsville Public Utility Board's (BPUB) demonstration seawater desalination project. The BPUB plans to initiate design and construction of a 25 million gallon per day demonstration seawater desalination plant within the 2008-09 biennium. The proposed project is part of the State of Texas initiative to develop abundant, drought-proof water supply sources through modern seawater desalination technologies. In a 2004 feasibility study, the BPUB determined that it would require financial assistance to implement the full-scale project. Absent a state or federal appropriation to fund this project, the State Participation program is the more competitive TWDB alternative to assist BPUB in its effort to develop the large-scale project. The project will include raw seawater intake, transmission to water treatment plant, screening, pre-treatment, reverse osmosis membrane treatment, storage, transmission of treated water to BPUB distribution system, transmission of brine waste stream for disposal. BPUB would require Page 4

ADMINISTRATOR'S STATEMENT

80th Regular Session, Agency Submission, Version 1 Automated Budget and Evaluation System of Texas (ABEST) DATE: 8/16/2006 TIME: 3:42:13PM PAGE: 5 of 5

Agency code: 580 Agency name: Water Development Board

\$20 million in State Participation financing in FY2008 to be utilized for design, permitting and environmental clearances, and \$145 million in FY2009 to be utilized for construction of the project along with construction phase engineering services. Legislative authorization is requested to issue up to \$165 million in general obligation bonds in the FY2008-09 biennium for BPUB's State Participation project and to pursue additional legislative appropriations of approximately \$10.3 million in the FY2008-2009 biennium for payment of debt service.

Executive Administrator's Salary Increase

The Executive Administrator oversees an agency responsible for managing financial programs that provide over \$425 million annually in grant and loan funding to political subdivisions of the state for water-related projects, managing a portfolio of political subdivision bonds, loans and securities of over \$4 billion, and developing a State Water Plan to manage the water resources of the state. The Executive Administrator is the only exempt position identified by the Legislature for the TWDB. The current salary cap for the Executive Administrator is \$115,000 per year for the Fiscal Years 2006-2007 biennium. Recent salary benchmarking indicates that the legislatively authorized salary for the Executive Administrator (currently \$115,000) is not comparable to that of similar positions in similar governmental entities. The ability of the Board to retain or attract a qualified Executive Administrator over an extended period under these circumstances could be impeded.

The TWDB is requesting to increase the maximum salary for the Executive Administrator to not-to-exceed \$135,000. In order to compensate the Executive Administrator at this higher level, TWDB would also need to request, in its Legislative Appropriations Request, reclassification from a Group 4 to Group 5 agency. (Note: The maximum allowed salary for a Group 4 agency is \$117,516 and the maximum allowed salary for a Group 5 agency is \$139,140.)

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Bays and Estuaries Program is mandated under Section 11.1491 of the Texas Water Code (also see 16.012, and 16.058). The purpose of this program is to determine the environmental needs of fresh water in bays and estuaries. TWDB and Texas Parks and Wildlife Department (TPWD) jointly established a data collection and analytical study program under legislative directives to perform studies necessary for determination of freshwater inflows needed to maintain the ecological health and productivity of Texas bays and estuaries. There are seven different scientific and engineering analyses in a completed freshwater inflow study involving sediments, nutrients, salinity gradients, biological productivity, fisheries, hydrodynamic modeling of circulation and salinity patterns, optimization of inflows to meet state management objectives, and verification of needs. The process includes coordination and negotiation with TPWD at various stages.

The purpose of Oil Spill Modeling Program is to support the General Land Office's Oil Spill Prevention and Response Program. The TWDB maintains and runs daily a predictive hydrodynamic model for use in forecasting bay currents in the event of an oil spill. Currently the models are executed daily for Sabine Lake and Galveston and Corpus Christi Bays. During a spill, an oil spill trajectory model is executed. The trajectory model will use the output from the hydrodynamic model if it is in one of the bays above. Graphics from the hydrodynamic model output are published daily via the Internet.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Increases in the amount of available data and improvements in modeling prompted several stakeholders to express a desire to revisit some of the earlier freshwater inflow studies. The dynamic nature of modeling accommodates ongoing enhancement of the individual models. While cooperative efforts are under way in Matagorda Bay, the Brazos Estuary and East Matagorda Bay, a stakeholder process has been initiated for Galveston Bay. TWDB is coordinating with Texas Commission on Environmental Quality (TCEQ) and TPWD on how to best accommodate stakeholder input into the studies.

The Surface Water Monitoring Program ensures that the quantity of surface water in Texas rivers and lakes is adequately monitored so that data is available to make informed decisions about supply needs and uses within the state. The programs implementing this strategy are mandated under Texas Water Code Chapter 15 (Subchapter M), Chapter 16 (Subchapter B), and Section 16.060.

The Instream Flow Program collects essential river data at potential future water development sites. TWDB staff engineers and biologists have taken the initiative to develop a methodology for determining instream flow needs to protect the ecology of rivers, particularly below proposed reservoir sites. The TWDB effort is part of a jointly established and maintained instream flow data collection and analytical study program with TPWD and TCEQ. Texas Water Code, Section 16.059, specifically identifies and authorizes that the TWDB accomplish the purposes of statute related to instream flows.

The Sedimentation Studies Program predicts the impact from a change in flow regime and construction of reservoirs on the delivery of sediment to the Trinity River delta and ultimately Galveston Bay.

The agency performs Hydrographic Surveys under Texas Water Code Sections 15.801 through 15.805 for the purpose of determining current capacities of reservoirs. The program also provides information on likely sedimentation rates, which in turn are used for water supply planning.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

The National Academy of Sciences (NAS) was engaged by the TWDB to review and critique our proposed instream flow analysis methodology. The NAS findings are expected in October 2004.

Instream flow activities involve close coordination with the USGS, technical oversight, contract management and a contribution of over \$1 million in state General Revenue funds for a Joint Funding Agreement (JFA) to maintain and operate streamgages and lake level monitoring equipment. Data is made available to the public in real time on the USGS and TWDB web sites. A December 2002 Programmatic Work Plan identifies priority of "In-stream flow sites" to be studied through the year 2010. The ability to collect and disseminate data is directly tied to the level of funding.

The Hydrosurvey Program is a cost recovery program and is driven by the lake owner's ability to pay for the survey. The only general revenue contribution utilized in this program provides 50 percent of staff salaries and a small amount of administrative costs. The US Army Corps of Engineers may provide matching funds to lake owners which reduce the burden on the lake owner. The performance of the program as described depends very much on the size of the lakes surveyed in any given year. When the program surveys several large lakes in a given year, the performance may appear reduced because it is based on the number of lakes surveyed. A further complication that may arise is that the surveying must be done when the lakes are full, or near-full. Drought conditions may have a negative impact on reported performance.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Texas Water Code, §16.021, directs the TWDB to collect, process, and facilitate public access to data and information. Other authority is under §36.1071, 36.159, and 36.160. The data are used by numerous agencies and citizens for economic, governmental, and social purposes. The Texas Natural Resources Information System (TNRIS) division serves as the natural resource information clearinghouse, training, and referral center for the state. TNRIS distributes a vast array of information to the public including: TWDB groundwater, water research, and planning reports; USGS maps; TxDOT maps; Flood Insurance Rate Maps and data; national wetland inventory maps; census data and maps; aerial photography, satellite imagery, and digital geographic information system (GIS) files.

The Borderlands Information Center (BIC) operates within TNRIS to provide information and customer service specifically aimed at the Texas/Mexico border region which is the area within 100 miles of the border. BIC collects geographic information including maps, aerial photography, satellite imagery, and databases from different U.S. and Mexican sources, and put as much as possible on the Agency Web site.

The Texas Strategic Mapping program (StratMap), authorized under §16.017 of the Water Code, provides digital data for use in Geographic Information Systems. This includes hydrologic, digital elevation and topography contours, transportation systems, aerial photography, political boundary, and soil survey information. The hydrologic data is integral with the National Hydrography Dataset(NHD).

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

This strategy produces a large and growing demand for electronic storage space and fast Internet service.

TNRIS collects data from various local, state, and federal sources and continuously works to place all data on the Internet for easy access. To accomplish this, two TNRIS programs are working to convert historical aerial photos and maps into digital products for both easier data distribution and to preserve the original documents. The TNRIS is responsible for distributing digital data as well as maps, photos, and analog data. The TNRIS –StratMap program produces large statewide datasets that form a major portion of the digital data to distribute.

Funds for two of the three BIC positions and project work have been provided by the U.S. Geological Survey, Environmental Protection Agency, Bureau of Reclamation, and other agencies. Current outside funding for BIC is coming contracts with the Texas Geographic Society (TXGS) and the Governor's Division of Emergency Management.

The StratMap program and TxWIN have many data providers and cooperators. Collecting funds from outside agencies requires significant budget modifications and contract management. Collecting data from cooperators also takes significant resources to obtain and assure appropriate quality of the data, and make the data readily accessible to end users.

Full utilization of the WIID depends on converting data into a standardize database platform for more efficient data storage and retrieval, representing a significant initial workload.

STRATEGY DESCRIPTION AND JUSTIFICATION:

Activities under this strategy include the development, maintenance, and execution of groundwater availability models (GAMs) in support of Groundwater Conservation Districts (GCDs), Regional Water Planning Groups (RWPGs), and state water planning. GAM is an initiative required by statute to develop state-of-the-art, numerical groundwater flow models that provide reliable information on groundwater availability in Texas. In addition to the modeling work, other activities include assisting in the identification, designation, and delineation of priority groundwater management areas; answering inquiries from the public, and performing special groundwater studies for public needs.

Other activities under this strategy includes assisting cooperators of the TxWin Program, reviewing groundwater availability for loan applicants, assisting RWPGs, helping GCDs prepare groundwater management plans, interpreting groundwater data, and setting up computer data systems for TxWIN cooperators. Special groundwater research projects (other than GAMs) include research on increasing recharge through playa lakes and monitoring spring flow in West Texas. The TWDB also maintains a water well (groundwater) database and provides experts in drought and general groundwater information who provide education outreach.

These activities are authorized under §§16.012, 16.015, 16.019, 16.051, 16.053, 35.004, 35.007, 35.012, 35.013, 35.018, 36.015, 36.120, and 36.1071-1073 of the Texas Water Code and 78th Legislature General Appropriations Act, Rider 12.

CODE	DESC	CRIPTION Ex	p 2005	Est 2006	Bud 20()7	BI	L 2008		BL 200)9

The need for more groundwater data has been highlighted by the Senate Select Committee on Water Policy, the Texas Groundwater Protection Committee, Regional Water Planning Groups, Groundwater Conservation Districts, and other private and public interests.

Development of groundwater availability models for all nine of the major aquifers was a legislative mandate under SB 2 of the 77th Legislature. Because of additional data, improving modeling techniques, and changed conditions, these models will need to be updated to reflect current information and technology. SB2 of the 77th Legislature also mandated developing groundwater availability models of the minor aquifers.

However, budget cuts over the past two years have affected the GAM program by canceling the contracting of some the modeling studies for the minor aquifers. Never-the-less, work plans for the research and development of data for the remaining unmodeled minor aquifers of Texas is underway. Continued research and investigation is needed for the development and conceptualization of models for the Presidio-Redford Bolson, the Cenozoic Pecos Alluvium, and other aquifers.

The workload associated with groundwater technical assistance is partly influenced by outside requests. In drought years and in years when groundwater legislation is being developed, we anticipate more requests. Groundwater Technical Assistance is currently operating with effective and highly capable staff at near full capacity. Additional workload would necessitate additional staff.

STRATEGY DESCRIPTION AND JUSTIFICATION:

This strategy implements TWDB's role in producing the state and regional water plans which are to provide for the orderly development, management, and conservation of water resources and drought preparedness and response so that sufficient water will be available at a reasonable cost to ensure public health, safety, and welfare; to further economic development; and to protect the agricultural and natural resources of the entire state or region. Grant funding is provided through the TWDB to the 16 regional water planning groups(RWPG) to help prepare the regional water plans. TWDB is responsible for developing long-range projections of population, and of water demands for municipal, irrigation, livestock, manufacturing, mining and steam electric power generation uses. An annual water use survey is conducted by TWDB for use in making the water use projections. The TWDB incorporates the 16 approved regional water plans into a state water plan.

The TWDB is actively analyzing and funding pilot seawater desalination projects, and playa lake groundwater recharge projects. The TWDB has a significant program that provides matching grant funds to develop water/wastewater facility plans, flood protection, research, regional water planning, and Federal Emergency Management Agency's flood mitigation planning. The results are used by RWPGs and other state and federal agencies.

These activities are authorized by §§6.011, 6.012, 11.1271, 11.1272, 12.0151 Chapter 15 (Subch. A, B & F) Chapter 15 (Subch B, C & D) National Flood Insurance Reform Act 42 United States Code §§4101 et seq.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Agency code:	580	Agency name: Water Development Board

OBJECTIVE:	2	Vater Planning and Financial Assistance Activities				Service C	ategori	es:			
STRATEGY:	2	Water Resources Planning				Service:	37	Income:	A.2	Age:	B.3
CODE	DESC	CRIPTION	Exp 2005	Est 2006	Bud 20	07	В	L 2008		BL 20	09

Only about ½ of the funding requests by Regional Water Planning Groups have been approved for region specific studies and projects needed to develop solutions to water supply needs identified by the RWPGs. This will result in a significant reduction in the amount, type, and quality of work that the regional water planning groups may undertake, which impacts the value and integrity of the regional water planning process. TWDB must coordinate with TCEQ, TDA and TPWD on regional and state water planning issues.

The Governor's desalination charge to TWDB in April 2002 reflects the need to incorporate desalination water supply sources to the water supply portfolio of the state. The state will support this reality by aiding in the development of large-scale seawater desalination plants, and by facilitating the transfer of technology. The Federal Government is providing a State and Tribal Assistance Grant of \$385,700 through the Environmental Protection Agency for desalination work at Freeport, Texas.

Research and planning grants are provided so that political subdivisions can prepare feasibility level studies for regional solutions to water supply and wastewater facility and flood protection problems.

Flood protection planning grants also helps communities to afford Corps of Engineers studies requiring a 50% match. Without TWDB funding, it could be impossible for some of these studies to go forward. Flood protection planning studies often result in requests to FEMA for FEMA floodplain map revisions.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Conservation Division within TWDB provides technical assistance to political subdivisions, regional water planning groups, and end users, on developing a water conservation program for a water utility or site, on water loss and leak detection, and on alternative sources of water such as wastewater reuse, rainwater harvesting, and desalination. These services are provided through one-on-one meetings, workshops and presentations, publications, the agency web site, and through assistance in evaluating and implementing water conservation management strategies. Water Conservation educational material for school classrooms is also developed and distributed by TWDB.

The TWDB also provides and manages grants to state agencies and political subdivisions for a number of agricultural water conservation activities and provides and maintains data on local and statewide irrigation water use and its impact on groundwater supplies. The agricultural metering program helps groundwater districts determine local irrigation water use and its impact on groundwater supplies. In FY 2005, the agency will be implementing the Agricultural Water Conservation Demonstration Initiatives (Re. SB 1094, 78th Legislature)

Since September 2003, the TWDB has been supporting the Water Conservation Implementation Task Force created by SB1094.

Water Conservation activities are authorized under the Water Code Sections 11.1271, 15.106, 15.208, 15.701-708, 15.975, 15.995, 16.012, 16.015, 16.0121, 16.022, 16.051, 16.053-16.055, 17.125, 17.277, Chapter 15 (Subchapter K), and Chapter 17 (subchapter J).

STRATEGY:	1	Water Conservation Education and Assistance				Service:	37	Income:	A.2	Age:	B.3
CODE	DESC	RIPTION	Exp 2005	Est 2006	Bud 20	07	F	BL 2008		BL 200	19

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Drought can increase the public interest in water conservation and in more opportunities for financial and technical assistance. Conversely, periods of adequate rainfall and water supplies can decrease the interest and demand for in water conservation assistance.

Applicants for more than \$500,000 in construction assistance from TWDB are statutorily required to develop and implement water conservation plans. The Conservation Division monitors the annual reporting required for the 3 years after financial assistance is provided.

The Water Conservation Implementation Task Force (WCITF) is charged with developing best management practices for water conservation. The current enabling statute abolishes the WCITF on January 1, 2005. Full funding will be needed in FY 06 and 07 in order for TWDB to adequately implement expected recommendations from the WCITF, and to continue with the level of technical assistance expected to be provided to political subdivisions and the public.

This strategy provides cost effective loan and grant assistance to communities through state programs. The programs include: Water Development Fund, Rural Water Assistance Fund, Rural Community Water and Wastewater Loan Program, State Participation, Groundwater Conservation District Loan Program (GCDLP), Small Community Hardship Program, and Agricultural Water Conservation Loan Program. Programs fund the construction of water, wastewater, flood control, and municipal solid waste related projects with the exception of the GCDLP which provides funds for initial start-up costs of newly created groundwater conservation districts.

Activities associated with providing financial assistance include verifying the legal, financial, engineering, and environmental aspects of the projects. These services and inspection and audit services ensure that state funds go to authorized purposes.

In order to make financial assistance available for most of the programs, the TWDB must sell bonds. TWDB staff actively manages the bond portfolio to ensure that financial assistance is available to the communities.

These activities are authorized by the Texas Constitution, Article 3, §§ 49-c, 49-d, 49-d-1, 49-d-2, 49-d-3, 49-d-4, 49-d-5, 49-d-6, 49-d-7, 49-d-8, 49-d-9, 50-d; Texas Water Code, Chapter 15 (Subchapters A-F, J, L, N, O-Water Infrastructure Fund, O- Pilot Program for Water and Wastewater Loans for Rural Communities, P-Rural Water Assistance Fund,), Chapter 16 (Subchapters E, F and J), Chapter 17 (except for Subchapter K and M.)

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Insufficient grant funding of the programs limits their potential effectiveness. The Rural Water Assistance Fund (for community projects owned by nonprofit corporations) and the Water Infrastructure Fund (for projects implementing the state water plan) were originally created with the intent to be funded with general revenue, but funds have never been appropriated.

The nature of small, rural and economically distressed community applicants require more staff involvement in order to successfully complete the application, construction and monitoring phases of the project. The reduction of resources for outreach, travel, inspection, and other activities continues to impact our ability to meet the needs of these applicants.

In addition, a factor impacting all state programs is that commercial market bond interest rates have hit 40-year historical lows in the summer of 2003, and rates have not gone up appreciably since that time. The low cost of borrowing funds in the market influences how applicants obtain their project financing.

CODE	DESC	CRIPTION Exp 2005	Est 2006	Bud 20	07	B	L 2008		BL 20(09

This strategy provides cost effective loan and grant assistance to economically distressed areas in affected counties through the Economically Distressed Areas program (EDAP), Colonia Wastewater Treatment Assistance Program (CWTAP), Colonia Self-Help program, and the Community Self-Help program. The CWTAP program receives its funding from the Environmental Protection Agency. The self-help programs require local participation by residents who provide labor for the construction program. These programs target communities with inadequate water services, sewer services and financial resources to obtain adequate services.

Activities associated with providing financial assistance include verifying the legal, financial, engineering, and environmental aspects of the projects. These services and inspection and audit services ensure that state funds go to authorized purposes and prevent fraud, waste and abuse.

In order to have the funds to provide loans to applicants, the TWDB sells bonds each year manages the portfolio of bond holdings and investments.

Authority for these activities include Texas Constitution, Article 3, Section 49-d-7 and 49-d-8 Texas Water Code, §§ 6.011, 6.012, 15.401, 15.407, Ch 15 (Subchapter A, B, C, L, P and Q); Ch 16 (Subchapter J); Ch.17 Subchapters K and M. Public Law (PL) 102-389 (Federal Appropriations Act of 1993); PL 103-327 (Fed. Appropriations Act of 1995); PL 104-99 (Federal Appropriations Act of 1996), Continuing Resolutions Nos. 3 and 4); PL 104-204 (Fed. Appropriations Act of 1997); and PL 105-65 (Fed. Appropriations Act of 1998.)

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

The EDAP program is in its final state as all feasible projects with potential sponsors have been identified and are being pursued. There are still projects in the facility planning stage that have no design/construction funding commitment.

The Self-Help programs are expected to continue helping small and disadvantaged communities as long as funds are available. Funds available to this program are limited and are also utilized for facility plans.

The nature of the disadvantaged community applicants require more staff involvement in order to successfully complete the application, construction and monitoring phases of the project. The reduction of resources for outreach, travel, inspection, and other activities continues to impact our ability to meet their needs.

STRATEGY DESCRIPTION AND JUSTIFICATION:

This strategy provides cost effective loan and grant assistance to communities through federally subsidized programs. Federally subsidized programs include the Clean Water State Revolving Fund (CWSRF), Drinking Water State Revolving Fund (DWSRF), These programs provide loans to entities for the construction of water and wastewater related infrastructure, respectively.

The federal subsidies come as grants through the Environmental Protection Agency and require application of federal standards and procedures and reporting requirements.

Activities associated with providing financial assistance include verifying the legal, financial, engineering, and environmental aspects of the projects. These services and inspection and audit services ensure that state funds go to authorized purposes and prevent fraud, waste and abuse.

The TWDB sells bonds to match the federal money, and manages the bond and investment portfolio.

Authorization comes from Texas Water Code, §§ 6.011, 6.012, 16.093, Chapter 15, (Subchapters J - SRF) and L -CPLP), 33 United States Code §§ 1251 et seq. - Federal Water Pollution Control Act; and 42 United States Code §§ 300f-300j-26 - Safe Drinking Water Act.

CODE	DESC	CRIPTION Exp 2005	Est 2006	Bud 2(007	В	L 2008		BL 20	109

Both the DWSRF and the CWSRF programs have priority rating requirements which may impact the applicant's decisions on whether to access the programs. EPA is proposing to increase the rating criteria of these programs which have the potential of reducing participation in the programs due to excessive time delays.

Although interest rates for the CPLP are low at 1% participation in this program is minimal. Potential applicants have various other funding sources offering grants, opposed to loans, for hook-ups.

An administration fee is charged on each loan to recover the TWDB costs of administering the program and managing the projects.

The rate of expenditures is expected to be uniform over the fiscal years for the CWSRF and DWSRF programs.

The nature of the small/rural community applicants require more staff involvement in order to successfully complete the application and construction phases of the project. The reduction of resources for outreach, travel, inspection, and other activities continues to impact our ability to meet their needs.

Little activity is expected for the CPLP because potential applicants are more interested in grants for this type of activity. Receipt of Federal grant funds will continue to be by reimbursement and is expected to be uniform over the biennium due to previously funded projects still in design and construction that require plans and specs approvals and inspection oversight during construction.

3	VI-54	Transfer Authorized. Included in amounts appropriated above in Strategy <u>A.2.1., Technical Assistance and Modeling and A.2.2</u> , Water Resources Planning, is \$1,612,722 out of the General Revenue Fund in each fiscal year of the <u>2006-072008-09</u> biennium to be transferred to the Water Assistance Fund No. 480, for the sole purpose of making grants to regional planning groups pursuant to Water Code, § 15.4061. The Texas Water Development Board is authorized to transfer these funds from the Water Assistance Fund to other accounts as authorized under Water Code, § 15.011 as needed to support the regional planning process. Also included in amounts appropriated above in Strategy A.2.2, Water Resources Planning is \$2,557,278 in balances and revenues to the Water Assistance Fund No. 480 in each fiscal year of the 2006-07 biennium. These amounts also shall be used for the purpose of making grants to regional planning groups pursuant to Water Code, § 15.4061.
		This rider change recommended to update fiscal year references and amounts. The portion recommended for deletion relates to a one-time use of balances to fund regional planning.
4	VI-54	Safe Drinking Water Act State Revolving Fund. Included in amounts appropriated above in Strategy B.1.3, Federal Financial Assistance, is up to \$3,837,234 \$3,460,334 out of the General Revenue Fund in each fiscal year of the biennium for the state match portion of the community/noncommunity water system and economically disadvantaged community accounts established under the Safe Drinking Water Act State Revolving Fund.
		Rider change recommended to revise amount requested in the base.

3.B. Rider Revisions and Additions F	Request
--------------------------------------	---------

Current Rider Number	Page Number in General Appropriations Act, 2006-2007	Proposed Rider Language				
5	VI-54	Appropriation: Water Assistance Fund. Included in the amounts appropriated above are balances in the Water Assistance Fund No. 480 (WAF) as of August 31, 2005 2007 and revenues accruing to the WAF during the 2006-07 2008-09 biennium, estimated to be \$7,282,406 \$4,784,192 during the 2006-07 2008-09 biennium. In addition to the amounts appropriated above, there is hereby appropriated to the Water Development Board all revenues accruing to the Water Assistance Fund No. 480 during the biennium beginning on September 1, 2005-2007, including receipts from the Water Resources Finance Authority. These funds shall be used as authorized in Chapter 15, Water Code.				
		This rider change is recommended to update fiscal year references and estimated amounts.				
7	IV-54	Appropriation: Agricultural Water Conservation Fund. Included in the amounts appropriated above out of the Agricultural Water Conservation Fund No. 358 is \$3,000,000 <u>1,038,704</u> in fiscal year <u>2006 2008</u> and \$3,000,000 <u>1,035,954</u> in fiscal year <u>20072009</u> for use pursuant to § 50-d of Article III of the Texas Constitution and Water Code, Chapter 17, Subchapter J. In addition to amounts appropriated above, there are hereby appropriated such amounts as may be necessary to administer and disburse funds for Ioans <u>and grants</u> through the agricultural water conservation program and to pay the principal and interest on agricultural water conservation bonds that mature or become due during the biennium beginning with the effective date of this Act, pursuant to § 50-d of Article III of the Texas Constitution and Water Code, Chapter 17, Subchapter J, to be transferred to the Agricultural Water Conservation Interest and Sinking Fund No. 359.				
		This rider change is recommended to update fiscal year references and amounts, and to ensure that appropriations continue for obligated grant funds.				

Current Rider Number	Page Number in General Appropriations Act, 2006-2007	Proposed Rider Language					
8	VI-55	Coordination with the Office of Rural and Community Affairs. The Texas Water Development Board (TWDB) and the Office of Rural and Community Affairs (ORCA) shall continue to coordinate funds out of the Economically Distressed Areas Program (EDAP) administered by the TWDB and the Colonia Fund administered by ORCA as outlined in a Memorandum of Understanding (MOU) to maximize delivery of the funds and minimize administrative delay in their expenditure. At the beginning of each fiscal year of the 2006-07 2008-09 biennium, the TWDB shall provide the ORCA a list of EDAP-funded areas whose colonia residents cannot afford the cost of service lines, hook-ups, and plumbing improvements associated with being connected to an EDAP-funded system. No later than September 15, 20062008, the TWDB and the ORCA shall submit a joint report to the Legislative Budget Board that describes and analyzes the effectiveness of projects funded as a result of coordinated Colonia Fund/EDAP efforts, including an estimate of the amount each agency has saved by reduced duplication of efforts.					
9	VI-55	Fee Appropriation: State Revolving Fund Program Operation. Included in the amounts appropriated above is \$6,483,4122,335,510 in fiscal year 20062008 and \$6,491,129.2,357,461 in fiscal year 20072009 in Appropriated Receipts fee revenue collected for the administration and operation of the State Revolving Fund (SRF) Program or additional state revolving funds created under Water Code, Chapter 15, Subchapter J. In addition to the amounts appropriated above, the Water Development Board is hereby appropriated any additional fee revenue collected for administration and operation of revolving fund programs for the biennium beginning September 1, 20052007. All fee revenue collected pursuant to the SRF program and additional state revolving funds may be deposited into an operating fund, including interest, may be used only for the purposes of reimbursing expenditures from appropriations in this Act. Such reimbursement shall include both direct expenditures for salaries and other expenditures and fringe benefits. In addition, the Texas Water Development Board may transfer amounts from the operating fund to the SRF or additional SRFs for uses pursuant to the Water Code, Chapter J. Subchapter J.					

This rider change is recommended to update amounts as requested in the 08-09 base request.

Current Rider Number	Page Number in General Appropriations Act, 2006-2007	Proposed Rider Language
10	VI-55	Use of Texas Water Resources Finance Authority (TWRFA) Funds. Included in the amounts appropriated above in Strategy A.1.2, Surface Water Monitoring and Assessment, Strategy A.1.4, Automated Information collection, Maintenance, and Dissemination, Strategy A.2.1, Groundwater Technical Assistance and Modeling, Strategy A.3.1, Water Conservation Education and Assistance, and Strategy C.1.2, Information Resources, is \$824,707 in fiscal year 2006 and \$827,568 in fiscal year 2007 in Appropriated Receipts derived from cash flows from the Texas Water Resources Finance Authority (TWRFA). Also included in amounts appropriated above in Strategy B.1.1, State Financial Assistance Programs, is \$161,607 in Appropriated Receipts in each fiscal year of the biennium derived from cash flows and reserved as operating costs of TWRFA and used to reimburse TWDB for administrative expenditures incurred by the Water Development Board in administering the TWRFA portfolio.
11	VI-54	Appropriation: Unexpended Balances in the Groundwater District Loan Assistance Fund. In addition to amounts appropriated above, the Texas Water Development Board is hereby appropriated any unexpended balances in the Groundwater District Loan Assistance Fund No. 363 as of August 31, 20052007. Any unexpended balances as of August 31, 20062008 are hereby appropriated for the fiscal year beginning September 1, 20062008. This rider change is recommended to update fiscal year references.

Current Rider Number	Page Number in General Appropriations Act, 2006-2007	Proposed Rider Language
12	VI-55	Appropriation: Cost Recovery for the State Participation Program. Included in the amounts appropriated above to the Texas Water Development Board in Strategy B.1.1, State Financial Assistance Programs, is \$100,548109,616 in fiscal year 2006 2008 and \$103,498 87,094 in fiscal year 20072009 in Appropriated Receipts collected for the administration and operation of the State Participation Program to be used for those purposes.
		In addition to the amounts appropriated above, there is hereby appropriated to the Texas Water Development Board any additional revenues collected for the administration and operation of the State Participation Program for the same purposes.
		This rider change is recommended to update fiscal year references and amounts included in the base 08-09 request.
15	VI-56	Appropriation: Financial Assistance to Unincorporated Communities. Out of amounts appropriated above out of Water Assistance Fund No. 480, the Water Development Board is hereby authorized to use \$400,000 in funds originally appropriated to the agency by the Seventy-sixth Legislature to provide grants to counties for the relocation of residents unable to utilize funds as originally intended. These funds shall be used to serve-unincorporated communities located in a county with a population of greater than 2 million but less than 2.5 million, based on the 2000 US Census data.
		This rider deletion is recommended since the funding has been placed under contract.

Current Rider Number	Page Number in General Appropriations Act, 2006-2007 VI-56	Proposed Rider Language			
16		 Nuisance Surveys for the Economically Distressed Areas Program. Out of amounts appropriated above out of the General Revenue Fund in Strategy B.1.2, Economically Distressed Areas, the Water Development-Board shall reimburse the Texas Department of Health for costs incurred by the Department in conducting nuisance surveys for applicants for financial assistance through the Economically Distressed Areas program administered by the Board. The Board shall reimburse such costs through Interagency Contracts with the Department of Health in an amount not to exceed a total of \$250,000 for the biennium beginning on September 1, 2005 This rider is recommended for deletion as it is not necessary to conduct business in FY08-09. TWDB has the authority to enter in to an interagency contract if needed. 			
18	VI-56	Appropriation: Water Infrastructure Fund. In addition to amounts appropriated above, there is hereby appropriated to the Water Development Board for the biennium beginning on September 1, 20052007, all available funds in the Water Infrastructure Fund (WIF) No. 302, including, but not limited to fund balances, revenues, bonds issued by the Water Development Board, and funds transferred to the WIF. <i>This rider change is recommended to update the fiscal year reference</i>			

3.B.	Rider	[•] Revisions	and	Additions	Request
------	-------	------------------------	-----	-----------	---------

Current Rider Number	Page Number in General Appropriations Act, 2006-2007	Proposed Rider Language				
19	VI-56	Appropriation: Brush Creek Reservoir (Lake Marlin). In addition to amounts appropriated above, the Texas Water Development Board is hereby appropriated \$400,000 out of General Revenue for the biennium beginning September 1, 2005. Such funds shall be transferred to the Water Assistance Fund No. 480 to be appropriated and used for grants for the local share of costs associated with development of Brushy Creek Reservoir (Lake Marlin). This rider deletion is recommended because the project is underway.				
20	VI-56	Interstate Reservoir Study. Out of the amounts appropriated above, the Water Development Board shall conduct a study of the operation of Toledo Bend Reservoir, considering the need for operating the lake at a minimum level of 168 feet and the impact of a minimum operation level on downstream flooding and contractual obligations. This rider deletion is recommended because after discussions with other agencies and legislative staff, the study is no longer needed.				
21	VI-56	Appropriation: Desalination. Included in amounts appropriated above out of the General Revenue Fund in Strategy A.2.2., Water Resources Planning, is \$3,200,000 <u>\$600,000</u> in fiscal year 2006 <u>2008</u> and \$100,000 in fiscal year 2007 to be transferred to the Water Assistance Fund No. 480. Of the amounts, \$3,100,000 in fiscal year 2006 shall be used for grants for the development of up to three pilot seawater desalination projects and for grants for the planning, permitting, design, and development of brackish groundwater desalination demonstration projects at sites to be determined, and \$100,000 in each year of the biennium shall be used for staff costs to oversee the projects, monitor the development of desalination technology, and provide educational outreach and technology transfer. Any unexpended balances remaining in this appropriation on August 31, 2006 <u>2008</u> are hereby appropriated for the fiscal year beginning September 1, 2006 <u>2008</u> .				
		This rider change is recommended to appropriately reflect the amount in the base appropriation.				

Current Rider Number	Page Number in General Appropriations Act, 2006-2007	Proposed Rider Language					
22	VI-57	Appropriation: Additional Staff Costs. In addition to the amounts appropriated above, the Water Development Board is hereby appropriated out of the General Revenue Fund an amount not to exceed \$155,745 in fiscal year 2006 and \$155,746 in fiscal year 2007 to be used for salaries for additional staff to optimize cash management processes and returns on Water Development Board investments, for increased water planning activities, and to improve agency customer service. This appropriation shall be transferred to the appropriate strategies (Items of Appropriation) listed above.					
		This rider deletion is recommended because the funding is already included in the base appropriation.					
New Rider	· · ·	Proposed Rider Language					
701	VI	Travel Expenditures. Notwithstanding the limitations on travel expenditures contained in Article IX of this Act, the annual out-of-state travel cap for the Texas Water Development Board is hereby set at \$75,000 for each year of the biennium. The additional authority is provided to allow TWDB professionals greater access to financial centers and national advisory and work groups providing training for federally funded programs.					
		This rider is requested to allow TWDB staff and board members greater flexibility in attending bond sales, infrastructure financing conferences, federal meetings, technology seminars and conferences for geographic information systems, and meetings with bordering states and nations regarding water availability and planning.

DESCRIPTION / JUSTIFICATION:

The 71st legislative session (1989) created the Economically Distressed Areas Program (EDAP) to provide financial assistance in the form of grants and loans for water and wastewater services to economically distressed areas in affected counties. The program includes measures to prevent future substandard development, including the requirement that all grant or loan recipients' county or city adopt Model Subdivision Rules, as legally applicable. As of March 2006, the EDAP has funded 85 projects in 22 counties, totaling \$501,149,509. Approximately 265,107 residents previously without adequate service either have or will have water and/or wastewater service directly because of these projects. The EDAP was initially funded in 1989 and 1991 with \$250 million in general obligation bonds and from 1993 through 1998, by \$300 million in EPA grant dollars. The majority of this funding has been committed to the 85 projects that are either completed or are currently in design/construction.

In order to complete existing projects and administer the estimated 3 new projects, the EDAP closeout requires 10 FTEs in FY2008 and 6 FTEs in FY2009 to provide basic technical assistance, training, adequate customer service, and coordination activities associated with the program. We anticipate remaining activity for this program should be completed in FY2009.

EXTERNAL/INTERNAL FACTORS:

Currently, some design/construction money remains, however, insufficient administrative funds remain with which to complete the projects. Additionally, our Stakeholders have clearly identified a strong need to continue the EDAP Program, in spite of the fact that the funds for it are almost depleted.

DESCRIPTION / JUSTIFICATION:

Based on the previous FY 04-05 Appropriations Act, the Texas Water Development Board's FY 06-07 LAR included a request for \$373,000 for FY 06 funding of the Municipal Water Conservation Program. This included \$296,000 from General Revenue and \$77,000 from Federal State Revolving Funds (SRF). A similar amount was requested for FY 07.

The FY 06-07 Appropriations Act, however, zeroed out the General Revenue funding for TWDB's Water Conservation Strategy A.3.1. In order to continue several significant statutory and/or agency rule required municipal conservation activities such as reviewing loan applications for required conservation plans and utility system water loss audits, providing assistance in development of regional water plans, and participation on the State Drought Preparedness Council, in September 2005 the TWDB Members approved the agency using funds from other programs on a temporary basis to fund a revised, reduced municipal water conservation program in FY 06-07. TWDB Members approved this partial funding with a clear statement that this method of funding could not be sustained and that funding would have to be restored in FY 08-09 for any continuation of the municipal water conservation activities.

This Exceptional Item Request for FY 08-09 would restore the TWDB's Municipal Water Conservation Programs to the previous GR funding and FTE levels of FY 04-05 (in addition to the federal funding that was not previously reduced), in order to meet statutory and rules requirements.

EXTERNAL/INTERNAL FACTORS:

Without restoration of funding for municipal conservation, other conservation activities could provide only about 25% of the target for TWDB water conservation performance measures.

					·	

TOTAL, METHOD OF FINANCING

DESCRIPTION / JUSTIFICATION:

This requests restoration of general revenue appropriation (\$753,800 in FY 2008-2009) for the disadvantaged community program of the Drinking Water State Revolving Fund to allow maximum utilization of the disadvantaged communities program based on the estimated Federal grant for FY 2008-2009.

The DWSRF is funded by annual federal capitalization grants and a required 20% match from the State. The TWDB uses general obligation bonds for the required match in the non-disadvantaged and non-private portion of the DWSRF. However, in order to fund the disadvantaged communities and privately owned water system portion of the DWSRF, the TWDB is required to obtain a cash source (such as state appropriations) for the match, given the state constitutional prohibition on the use of general obligation bonds to provide benefit to private individuals.

This request is to restore general revenue appropriation for the disadvantaged community program of the Drinking Water State Revolving Fund to allow maximum utilization of the disadvantaged communities program based on the estimated grant for FY08-09. This will enable disadvantaged communities to have more affordable clean drinking water.

EXTERNAL/INTERNAL FACTORS:

In FY 1997 through FY 2003, the Legislature appropriated \$38.4 million to the TWDB for state match to Environmental Protection Agency (EPA) DWSRF capitalization grants. The appropriations allowed the TWDB to fund projects for community/non-community water systems (private water systems) and for loan forgiveness in disadvantaged communities. During the 78th Legislative Session in 2003, cuts were made to both the FY 2003 and the FY 2004-2005 appropriations, the general revenue appropriation for state match was reduced by \$462,853 for each year of the FY 2004-2005 biennium (from \$3.6 million to \$3.1 million). As a result, the amount of disadvantaged assistance made available by the TWDB for FY 2006-2007 was reduced by \$4.6 million (from \$35.9 million to \$31.3 million) for the biennium. The estimated match for federal grants for FY 2008-2009 results in a need for a total increase of \$376,900 per year in order to achieve the maximum funding amount for loan forgiveness for disadvantaged communities allowed by the federal law.

FULL-TIME EQUIVALENT F	POSITIONS (FTE):		3.00	5.00

DESCRIPTION / JUSTIFICATION:

The Disadvantaged Rural Community Water and Wastewater Program (RCWWP) was authorized by the 79th legislative session (HB3029). The purpose of the program is to provide grant and loan financial assistance to rural communities with populations of 5,000 or less. In addition to the legislature recognition of this need, during the Texas Water Development Board's (Board) stakeholders meeting (October 2005), many of the stakeholders voiced the concern that there appeared to be a lack of funding for the small and rural disadvantaged areas of the state.

This program requires 3 FTEs in 2008 and 5 FTEs in 2009 to provide customer service, including technical assistance, training, and coordination activities associated with the program. If funding for these FTEs is not approved, staff working on other program matters would have to reallocate their time to work on the preveiously identified RCWWP funding. This would result in a workload issue and be a detriment to accomplishing the goals and objectives of the agency.

EXTERNAL/INTERNAL FACTORS:

The need for the RCWWP is further supported by the overwhelming response to an identical program, the Small Community Hardship Program (SCHP). In FY 2004, the Board exhausted the majority of the funds available for the SCHP. Within six months of the SCHP inception, the Board had made six commitments worth \$3,470,500. At the time the Board made these six commitments, there were additional communities that were interested in the program and were turned away because of lack of funding. It is anticipated that the SCHP will be closed after completion (construction) of all new projects. All new projects will be funded through the RCWWP. To date, Board staff still field inquires regarding the status of the program.

TOTAL, METHOD OF FINANCING	\$321	,863 \$300,626
FULL-TIME EQUIVALENT POSITIONS (FTE):		6.00 6.00

DESCRIPTION / JUSTIFICATION:

The 79th Legislature passed a landmark groundwater management bill, House Bill 1763, which established significant new roles and responsibilities for groundwater conservation districts and the TWDB. The bill, however, passed near the end of the legislative session without adequate time to incorporate funding for the statutorily-required functions into the appropriations bill. As a result, the impacts to TWDB have been considerable as the agency made a commitment in FY 06-07 to initiate the various tasks required by the bill despite the lack of funding. In addition, the scope and breadth of the tasks required by the bill are much greater than originally anticipated and for which costs were estimated in the fiscal note. As the activities mature, the impact of the legislation only grows.

EXTERNAL/INTERNAL FACTORS:

House Bill 1763 greatly expanded the role of groundwater management areas in managing the groundwater resources of Texas. Groundwater conservation districts in each of the sixteen groundwater management areas are now required to decide the desired future conditions of their groundwater resources. The desired future conditions are then used to calculate the managed available groundwater, which is the amount of groundwater available for permitting and the amount of groundwater available to meet future demands in regional water planning. The process of deciding desired future conditions, calculating managed available groundwater, and responding to petitions against desired future conditions requires considerable technical and legal support, especially if the state desires reasonable and defendable numbers. Most of the districts will need significant levels of support from TWDB to make good on the requirements of HB 1763.

TWDB requires additional resources to ensure implementation of the bill in all groundwater management areas.

DESCRIPTION / JUSTIFICATION:

The term "Environmental Flows" is used to describe two state programs: The Bays and Estuaries program, which was created in 1975, and the Instream Flow program, which was created through passage of Senate Bill 2, in 2001. Senate Bill 2 directed the state's natural resource agencies (TWDB, Texas Parks and Wildlife Department, the Texas Commission on Environmental Quality and other appropriate governmental agencies) to jointly establish and continuously maintain an instream flow data collection and evaluation program for determining the flows necessary to support a sound ecological environment in our streams and rivers. Governor Perry's recent Executive Order (RP-50) highlights the importance of the state's environmental flow programs.

The cost to perform an instream flow study on a river sub-basin is estimated at \$1 million. While the program was authorized in 2001, it has never been adequately funded. To keep the program viable, the agency has had to shift a limited amount of funding from other activities, and has been able to fund research and data collection only. Increased funding is necessary to move towards completing most tasks for the priority instream flow segments by the 2010 deadline.

EXTERNAL/INTERNAL FACTORS:

4:03:02PM

80th Regular Session, Agency Submission, Version 1

Automated Budget and Evaluation System of Texas (ABEST)

DATE: 8/16/2006 TIME: 4:03:02PM

Agency code: 580

Agency name:

Water Development Board

CODE DESCRIPTION

Excp 2008 Excp 2009

While the Instream Flow program focuses on the state's rivers and streams, the ecological integrity of Texas bays and estuaries is also important. The economy of many coastal communities is strongly influenced by commercial fishing and eco-tourism activities such as birding, boating, recreational fishing and swimming, which can only flourish in healthy bays and estuaries. Without adequate funding, the Eviromental Flows Program will not meet the needs and expectations of policymakers and stakeholders.

80th Regular Session, Agency Submission, Version 1

Automated Budget and Evaluation System of Texas (ABEST)

Agency code: 580 Agency name: Water Development Board DESCRIPTION Excp 2008 CODE Excp 2009 **Item Name:** Restoration of General Revenue for Regional Planning **Item Priority:** 7 Includes Funding for the Following Strategy or Strategies: 01-02-02 Water Resources Planning **OBJECTS OF EXPENSE:** 4000 GRANTS 2,500,000 2,500,000 TOTAL, OBJECT OF EXPENSE \$2,500,000 \$2,500,000 **METHOD OF FINANCING: GENERAL REVENUE FUND** 1 2,500,000 2,500,000 TOTAL, METHOD OF FINANCING \$2,500,000 \$2,500,000

DESCRIPTION / JUSTIFICATION:

Restoration of General Revenue funds for Regional Water Planning will provide a reliable source of funding for an ongoing statutorily-required activity.

Because of the change in approach to state water planning, as well as new requirements that the TWDB only fund projects consistent with the State Water Plan, the Regional Water Planning group within the Water Resources Planning Division can expect to see increasing amounts of water utilities and municipalities requesting their services as more and more residents become involved in water planning.

EXTERNAL/INTERNAL FACTORS:

Current funding for regional water planning comes from two sources: (1) General Revenue; and (2) balances in the Water Assistance Fund (WAF). The WAF balance does not provide a reliable source of funding for the analyses required to make decisions on how the state's water supply needs will be met in the future. A reliable source of funding is needed to allow local and regional groups to develop approaches and methodologies for planning with a level of certainty that the associated studies and analyses will be funded.

DESCRIPTION / JUSTIFICATION:

The Texas Strategic Mapping program (StratMap) develops, enhances, and maintains statewide digital base map datasets suitable for numerous applications employed by local, state, and federal agencies, businesses, universities, and the public.

StratMap operated in a data generation mode from fiscal years 1998 through 2001 and produced seven statewide datasets. These were digital aerial photography, surface water, digital elevation models, elevation contours, transportation, soil surveys, and political boundaries. In fiscal year 2002 the program entered a maintenance phase and GR for capital purchases of digital data was set at \$1,268,000. By fiscal year 2007, program capital GR had fallen to \$722,071; however, in order to keep the program viable, TWDB has budgeted \$308,000 in appropriated receipts to help fund the program.

This exceptional item seeks to restore general revenue (GR) funds that have decreased due to statewide agency budget constraints. The budget reductions have both reduced funding for capital purchases through the program and necessitated the transfer of funds from other programs to StratMap.

EXTERNAL/INTERNAL FACTORS:

Restoring GR for StratMap will ensure that StratMap can maintain critical datasets such as transportation, surface water and digital aerial photography. Furthermore, the restoration would allow the program to respond to the growing use of geographic data by emergency management agencies and first responders. The StratMap program would then be able to expand development of additional statewide base mapping datasets identified as priorities by the Texas Geographic Information Council (TGIC).

DESCRIPTION / JUSTIFICATION:

Texas Water Code (§16.012) mandates the TWDB "...to lead a statewide effort, in coordination with federal, state, and local governments...to develop a network for collecting and disseminating water resource-related information ..." Information on the water resources of Texas is critical for meeting future needs and developing answers to important water resource issues. Unfortunately, the state's real-time monitoring network is currently inadequate for assessing the state's surface and groundwater resources.

This request would allow the TWDB to reach 100 percent adequacy on the surface water monitoring Core Network by increasing from 234 to 262 the number of active core network streamgaging stations. In 2001, TWDB identified a Core Network of gages that is the minimum number of stations needed to adequately monitor and manage the state's surface water resources. The Texas Core Network of streamgages represents sites that meet one or more of the following four objectives: (1) geographic distribution and regionalization, (2) major flow, (3) outflow from the state, and (4) long-term monitoring for statistical analyses. Streamgages are essential for real-time flood forecasting, drought management and long-term water resources planning.

Expansion of the groundwater monitoring network from 65 to 254 station is important as part of the regional water planning process to examine current water supplies and evaluate the regions' future needs in the next 50 years. Accurate and comprehensive information is essential, and this expansion will help achieve parity in the geographic distribution of all real-time monitoring sites and provide all counties with at least one real-time recorder to complete the network. In turn, increased data collection in areas that

TIME:

have historically lacked coverage will provide for more accurate water planning and projections. These data will also increase information to Texans on the status of the state's water resources.

EXTERNAL/INTERNAL FACTORS:

The need for more data has been noted by the Senate Select Committee on Water Policy, the Texas Groundwater Protection Committee, Regional Water Planning Groups, Groundwater Conservation Districts, and other private and public interests. Forty-eight predominantly one-county GCDs and 97 counties with no districts currently do not have the resources to monitor groundwater levels and host on-line, real-time water-level information. A base level of water monitoring is critical to policy makers and water managers. This data will also increase information to Texans on the status of the state's water resources. Streamgages are essential for real-time flood forecasting, drought management and long-term water resources planning. Expansion of the groundwater monitoring network would allow each municipality in a county that uses an aquifer for water can obtain the data in real-time from the TWDB Web page.

The U.S. Geological Survey Cooperative Water Program provides a mechanism whereby local entities can contribute 50 percent of the cost of a gaging station and, subject to availability, the federal government will provide the other 50 percent match thereby stretching our data collection efforts further than would otherwise be possible.

FULL-TIME EQUIVALENT POSI	'IONS (FTE):	2.00	17.00

DESCRIPTION / JUSTIFICATION:

The 71st legislative session (1989) created the Economically Distressed Areas Program (EDAP) to provide financial assistance in the form of grants and loans for water and wastewater services to economically distressed areas in affected counties. The program includes measures to prevent future substandard development, including the requirement that all grant or loan recipients' county or city adopt Model Subdivision Rules, as legally applicable. As of March 2006, the EDAP has funded 85 projects in 22 counties, totaling \$501,149,509. Approximately 265,107 residents previously without adequate service either have or will have water and/or wastewater service directly because of these projects. The EDAP was initially funded in 1989 and 1991 with \$250 million in general obligation bonds and from 1993 through 1998, by \$300 million in EPA grant dollars. The majority of this funding has been committed to the 85 projects that are either completed or are currently in design/construction.

The 79th legislature passed HB 467 that changed the definition of an affected county to any county that has an economically distressed area (further defined as an area having a median household income that is not greater than 75% of the median state household income). Essentially, those definition changes made the EDAP a state-wide program. However, in spite of the fact that the program was enlarged by definition, not only was funding for it not enlarged, but appropriation for the expanded EDAP program was totally absent.

EXTERNAL/INTERNAL FACTORS:

This request for appropriations is based on the fiscal note initially attached to the legislation expanding the program. This request includes \$50 million in assistance grants with the assumption that there will be no issuance of bonds to fund the program. The issuance of bonds for the program will require a constitutional amendment (SJR) be proposed during the next session (as was initiated during the 79th session).

80th Regular Session, Agency Submission, Version 1

Automated Budget and Evaluation System of Texas (ABEST)

Agency code: 580 Agency name: Water Development Board DESCRIPTION CODE Excp 2008 Excp 2009 Item Name: Restoration of Funding for Desalination Grants **Item Priority:** 11 Includes Funding for the Following Strategy or Strategies: 01-02-02 Water Resources Planning **OBJECTS OF EXPENSE:** 4000 GRANTS 2,500,000 0 TOTAL, OBJECT OF EXPENSE \$2,500.000 **\$0 METHOD OF FINANCING:** 1 **GENERAL REVENUE FUND** 0 2,500,000 **\$0** TOTAL, METHOD OF FINANCING \$2,500,000

DESCRIPTION / JUSTIFICATION:

During the 79th Legislature in 2005, H.B. 1 appropriated \$3.3 million to the TWDB to further efforts necessary to find an alternative water supply source. The TWDB has been actively engaged in scientific research and education on and demonstration of desalination. Development of pilot plants for testing the quality and range of variation of the raw water and the ability of different membranes to process the raw water is the necessary next step for the eventual production of potable water through desalination. The legislature appropriated funds for the development of pilot projects, and in April 2006 TWDB awarded grant funding in the amount of \$1.3 million for pilot plant studies and seawater desalination.

This request of funding would enable TWDB to provide grant funding for pilot plant studies for seawater desalinization facilities in Texas. The downward trend of desalination costs, and upward trend of technological advances is contributing to more efficient desalination projects. State assistance for desalination could prove to be especially beneficial to smaller and rural communities.

EXTERNAL/INTERNAL FACTORS:

Governor Rick Perry has charged the TWDB with taking the lead to develop desalination in Texas. This request will continue to help keep the momentum in the development of drought proof water supplies from seawater.

1 GENERAL RE'	VENUE FUND	1,055,000	1,055,000
TOTAL, METHOD	OF FINANCING	\$1,055,000	\$1,055,000

DESCRIPTION / JUSTIFICATION:

This appropriation would fund planning, design, construction and operation of demonstration facilities using innovative, cost-effective water-supply technologies in small-utility settings and focusing on: a) Demonstrating cost-effective technologies targeting compliance with new Safe Drinking Water Standards; and, b) Developing new water-supplies from impaired water resources including brackish groundwater, seawater, by-product water from oil and gas mining and reuse. The demonstration projects would be designed to maximize the educational and technology transfer value and to systematically inform the regional water planning process of the potential created by these new technologies. Demonstration projects are a particularly valuable tool to provide practical, geographically close examples of the use of technologies to help address new drinking water standards such as the Arsenic Rule. The Texas Commission on Environmental Quality estimates that there are approximately 220 water systems that have at least one well that will exceed the new Arsenic standard of 10 micro-grams per liter. Many of these water systems will need new or improved water supply infrastructure to address the arsenic violations. The cost of this effort was estimated at \$425 million in 2004. Some of these improvements will likely involve newer treatment technologies. There are about 125 water systems that violate regulations on other naturally occurring contaminants (other than arsenic) and approximately 150 water systems that will have to make changes to their disinfection practices in order to meet the new requirements.

EXTERNAL/INTERNAL FACTORS:

The pace of new technology developments and the complexity of new products challenge smaller communities that lack resources to monitor, test and incorporate new tools in their systems. The use of demonstration projects is a pratical approach to facilitate this process.

DESCRIPTION / JUSTIFICATION:

The TWDB is mandated to provide a multitude of border related services. Sec 16.021 of the Texas Water Code provides that TNRIS: "(5) acquire and disseminate natural resource and related socioeconomic data describing the Texas-Mexico border region;" Furthermore, HB 925 states the Texas Water Development Board, "...maintain and update an Internet-based directory of border projects...containing information about projects in the border region in which a state agency is involved. The board shall establish guidelines as to which projects and information are to be included in the directory." In Addition, SB827 sets colonia reporting requirements for the Secretary of State to include details on "... any projects funded by the board [TWDB] that serve colonias by providing water or wastewater services or other assistance."

The current Borderlands Information Center (BIC) within TWDB/TNRIS is dependent upon grant funding to maintain its personnel and to fulfill its mission. These sources of funds make the BIC dependent upon other initiatives and unable to establish a consistent mission and service to address the dynamic issues associated with the border area. Establishing a central geographic data catalog and information center will support Health, Environmental, Infrastructure, Economic Development, Agriculture, Education, Emergency Response and Homeland Security issues. A centralized database of resources and current project activities will support multi-agency coordination required by HB925 and SB827

TOTAL, METHOD OF FINANCING			\$384,625	\$390,266
FULL-TIME EQUIVALENT POSITIONS (FTE):			1.50	1.50

DESCRIPTION / JUSTIFICATION:

The Colonia Self-Help program provides grant assistance to grass roots initiatives in economically distressed areas. Residents, in exchange for grant assistance, volunteer to provide labor (sweat equity) to construct the facilities and/or donate equipment, materials and supplies. During the 77th legislature the TWDB was given authority to award funding for self-help projects directly to non-profit organizations. Since then, the TWDB has committed \$213,794 to nine construction projects through the Colonia Self-Help program. Recently, Board staff received documentation from The Rensselaerville Institute (TRI) that identified approximately \$1.5 million of need. In addition to the information received from TRI, during the Board's stakeholders meeting (October 2005), comments specifically emphasized the need for these projects.

While \$300,000 per annum does not immediately address the identified needs, this amount addresses the anticipated number of projects based on historical figures. In addition, TRI is currently the only non-profit participating in this program.

This program requires 1.5 FTEs in 2008 and 1.5 FTEs in 2009 to provide customer service, including technical assistance, training, and coordination activities associated with the Self Help Program.

EXTERNAL/INTERNAL FACTORS:

If funding for this request is not approved, staff working on other program matters would have to reallocate their time to work on these matters. This would result in a workload issue and be a detriment to accomplishing the goals and objectives of the agency.

PROJECT DESCRIPTION

General Information

The Texas Strategic Mapping Program, managed by a division of the Texas Water Development Board, is a statewide initiative for the creation, enhancement, maintenance and distribution of geospatial data for the State of Texas The program is guided by statewide needs for digital data, as identified by the Texas Geographic Information Council

The geographic data products are acquired and managed as separate thematic layers The primary layers include statewide coverage for: 1 meter resolution orthoimagery, transportation, hydrography and political boundaries, which require continuous investment to maintain currency and provide increased levels of information detail A total of 24 layers, not currently funded, comprise the digital basemap plan, as documented by TGIC. The creation of common statewide data is guided by the adoption of common standards, identification of potential funding sources and establishment of partnerships with local and regional data sources.

StratMap funding is leveraged with matching funds solicited from federal regional, local and municipal partners to create and maintain digital geographic data. The StratMap program has attracted over 30 million dollars of federal funding through its successful creation, management and refinement of statewide data strategy. StratMap represents a pioneering effort in the consolidation of shared data resources and has avoided significant costs to the state through its data partnerships As data services develop at TNRIS additional savings are realized by using internet mapping capabilities that mitigate the cost for duplicated data management by data users

StratMap disseminates these data and derivative products to other state agencies, institutions, commercial interests, and the public via the internet. The data serves diverse needs in emergency management, social services, economic development, law enforcement, taxation and other key components of government and public services

PROJECT DESCRIPTION

General Information

The Water Information Integration and Dissemination (WIID) project was implemented in 2001 pursuant to four mandates that directed the Texas Water Development Board to change and improve its methods of information delivery Senate Bill 1, which was passed during the 75th Legislature, mandated that the TWDB and other water agencies coordinate the "gathering, updating, and assimilation of existing water data available to the agencies" The second mandate was from the State Strategic Plan for Information Resources Management which challenged State agencies to provide direct and easy access to information to the citizens of Texas through the use of technology. The third mandate came from a survey conducted by the TWDB in 2000 which indicated that customers needed more TWDB water-related data available on the Internet. The last mandate came from a 1998 State Auditor Report on Management Controls at TWDB which recommended increased communication data sharing and coordination between TWDB's Office of Planning and the Office of Project Finance and Construction Assistance

The WIID was a four-year initiative to improve internal and external access to water-related data utilizing web-based Geographic Information Systems (GIS) technology. The WIID application currently integrates data from six critical TWDB datasets and serves this data to the public via the Internet. The datasets include the Financial Information System (currently funded water projects), Groundwater Database, Facility Needs, Inspection Field Support Services, Water Use Survey, and the Regional Water Planning Database.

Funding for the WIID allows for system maintenance as well as future enhancement initiatives such as the integration of additional geographic reference data, more TWDB water data and links to other agency's water related datasets. The WIID serves as the primary water portal for public access to critical TWDB water related data.

COMPARISON TO STATEWIDE HUB PROCUREMENT GOALS

A. Fiscal Year 2004 - 2005 HUB Expenditure Information

Procurement Category	Statewide Adjusted HUB Goals	Adjusted HUB FY 20	•	Total Expenditures FY 2004	Adjusted HUB FY 2	-	Total Expenditures FY 2005
		HUB %	HUB \$		HUB %	HUB \$	
Special Trade Construction	47.0%	100.0%	\$136	\$136	0.0%	\$0	\$0
Professional Services	18.1%	0.0%	\$0	\$494,306	0.0%	\$0	\$277,215
Other Services	33.0%	7.1%	\$360,012	\$5,092,409	30.0%	\$642,675	\$2,143,948
Commodities	11.5%	30.5%	\$224,485	\$737,125	16.9%	\$200,529	\$1,189,569
Total Expenditures		9.2%	\$584,633	\$6,323,976	23.4%	\$843,204	\$3,610,732

B. Assessment of Fiscal Year 2004 - 2005 Efforts to Meet HUB Procurement Goals

Attainment:

In FY 2004, the Agency attained or exceeded 2 of 4, or 50% of the applicable statewide HUB procurement goals.

In FY 2005, the Agency attained or exceeded 1 of 3, or 33% of the applicable statewide HUB procurement goals in FY 2005.

Note: For FY 2004 and 2005, the 'Professional Services' category does not include Investment Transaction fees distributed to HUB firms. In FY 2004, approximately \$29,600 in fees was distributed to HUB firms; in FY 2005, the amount was approximately \$62,236.

Applicability:

In FY 2004, the Agency did not have any strategies or programs related to the Heavy Construction or Building Construction procurement categories. Therefore, these categories are not applicable to agency operations for FY 2004.

In FY 2005, the Agency did not have any strategies or programs related to the Heavy Construction, Building Construction, or Special Trade procurement categories. Therefore, these categories are not applicable to agency operations for FY 2005.

Factors Affecting Attainment:

In FY 2004, the State Energy Conservation Office (SECO) and Water Assistance Fund contracts prevented the Agency from reaching the goals in the Professional and Other Services procurement categories. The Agency paid \$1,449,980 on SECO contracts to irrigation districts, and \$2,709,335 on Water Assistance Fund contracts to private firms for Water Research projects. These contracts require highly specialized and unique expertise with few, if any, HUB vendors available to perform the service.

In FY 2005, The Water Assistance Fund, Paying Agent and Rating Agent contracts prevented the Agency from reaching the goals in the Professional and Other Services procurement categories. The Agency awarded several large contracts for these specialized services in which the most qualified respondents were non-HUB firms. Although the Agency makes every effort to include HUB firms in their solicitations for these specialized contracts, it continues to encounter a lack of qualified HUB firms available in the required area of expertise.

6.A. HISTORICALLY UNDERUTILIZED BUSINESS SUPPORTING SCHEDULE

80th Regular Session, Agency Submission, Version 1 Automated Budget and Evaluation System of Texas (ABEST)

"Good-Faith" Efforts:

In FY 2004 and 2005, the Agency made the following good faith efforts to comply with statewide HUB procurement goals:

•Implemented requirements of the Texas Building and Procurement Commission's (TBPC) HUB Rules;

•Participated in multiple statewide Economic Opportunity Forums and other HUB-related outreach efforts and events;

•Participated in HUB Discussion Workgroup meetings, and quarterly TBPC HUB Cooperative Committee meetings;

•Encouraged HUB vendors to get TBPC certification and assisted them with the process;

•Served as a liaison between the Agency's purchasing staff and interested HUB vendors who were interested in introducing and showcasing their goods and services; •Utilized the TBPC's HUB and Centralized Master Bidders List in Board procurement activities;

•Posted online information to the Agency's website, including current procurement opportunities, and guidance and information related to the Agency's HUB program.

SUMMARY OF SPECIAL CONCERNS/ISSUES

Assumptions and Methodology:

The agency's federal funds revenue is derived by grants from various federal agencies including the U.S. Environmental Protection Agency, Federal Emergency Management Administration, and the U.S. Geological Survey. Actual revenues generated are reimbursements for direct charges to specific federal programs Using historical charges, coupled with a projection of increased or decreased activity related to the program, the agency estimates the amount of federal funds that will be generated for each year

Potential Loss:

TWDB continually evaluates the justifications for making direct charges to federal grants Potential exists for a need to reduce direct charges based on the work performed and the shifting priorities of the applicable federal program. In cases where the direct charges are reduced, the associated indirect charges (i.e., earned federal funds) would also decline.

USE OF HOMELAND SECURITY FUNDS

The TWDB houses the Texas Natural Resources Information System (TNRIS), the state's clearinghouse for natural resource and geospatial data. TNRIS receives emergency management funding from the Federal Emergency Management Agency (FEMA) and the Governor's Division of Emergency Management (GDEM) to support the development of digital geographic data to be used for flood management, flood plain map modernization, critical infrastructure risk assessment, hazard mitigation planning, and emergency response. FEMA funds are issued directly to TNRIS as part of FEMA's Cooperating Technical Partnership program, or from FEMA through GDEM as part of the Hazard Mitigation Grant Program operated by the State.

The Texas Water Development Fund II (Dfund II) was adopted in 1997 by Article 3, section 49-d-8 of the Texas Constitution. DFund II modernized the flow of funds and maximized the use of remaining bond authorizations. Method of Calculation and Revenue Assumptions: The final Dfund I bonds were refunded in FY06, so previous Dfund I balances are reported in Dfund II. Although EDAP and State Participation are part of Dfund II, the debt service is included in the GAA, so they are not included in the figures for Dfund II. Beginning balances for FY06 from the FY05 AFR. Estimated revenues for FY07 - 09 from cash flow projections based on schedules and estimated repayments of loans. No additional bond sales

are projected.

Revenues defined to include loan repayments and interest as projected for FY07 - 09, and prepayments for FY06.

6.H. Estimated Total of All Agency Funds Outside the GAA Bill Pattern Texas Water Development Board

Constitutional or Statutory Creation and Use of Funds:

The State Revolving Fund (CWSRF) was created in 1987 under Section 15.601, Texas Water Code. The CWSRF is held separately from other funds by the TWDB outside the State Treasury to provide financial assistance to political subdivisions for construction of wastewater treatment works. The CWSRF consists of money derived from federal grants, direct appropriations, and investment earnings. The CWSRF shall remain in perpetuity for providing financial assistance in accordance with the federal act. All payments of principal and interest and all proceeds from the sale, refunding or prepayment of bonds of political subdivisions acquired in carrying out the purposes of the CWSRF shall be deposited in the CWSRF.

Method of Calculation and Revenue Assumptions:

Beginning balances for FY06 from the FY05 AFR. Estimated revenues for FY07 - 09 from cash flow projections based on schedules and estimated repayments of loans. No additional bond sales are projected.

Revenues defined to include loan repayments and interest as projected for FY07 - 09, and prepayments for FY06.

Drinking Water State Revolving Fund

Estimated Beginning Balance in FY 2006 Estimated Revenues FY 2006		\$ \$	83,334,176 49,649,753
Estimated Revenues FY 2007		\$	48,079,151
	FY 2006-07 Total	\$	181,063,080
Estimated Beginning Balance in FY 2008		\$	92,358,139
Estimated Revenues FY 2008		\$	26,921,130
Estimated Revenues FY 2009		\$	31,759,626
	FY 2008-09 Total	\$	151,038,895

Constitutional or Statutory Creation and Use of Funds:

The Drinking Water State Revolving Fund (DWSRF) was established in 1997 under Section 15.6041, Texas Water Code. The DWSRF was created to provide financial assistance to political subdivisions for community water systems and for nonprofit non-community water systems; persons other than political subdivisions for community water systems or nonprofit noncommunity water systems; and persons, including political subdivisions, for service to disadvantaged communities; and for other purposes authorized by the federal Safe Drinking Water Act.

Method of Calculation and Revenue Assumptions:

Beginning balances for FY06 from the FY05 AFR. Estimated revenues for FY07 - 09 from cash flow projections based on schedules and estimated repayments of loans. Revenues defined to include loan repayments and interest as projected for FY07 - 09, and prepayments for FY06.

Explanation of Impact to Programs and Revenue Collections

A.2.2. Water Resources Planning

The TWDB has been actively engaged in scientific research and education on desalination throughout the past several years and is continuing to move forward in its support for desalination research and pilot program implementation. Creation of pilot plants for testing the quality and range of variation of the raw water and the ability of different membranes to process the raw water is the necessary next step for the eventual production of potable water through desalination. The Brownsville public Utility Board was recently awarded grant funding to pursue plant development for seawater desalination. This reduction will limit the furtherance of this program.

B.1.3. Federal Financial Assistance

The Drinking Water State Revolving Fund (DWSRF) is funded by annual federal capitalization grants and a required match from the State. The TWDB uses general obligation bonds for the required match in the non-disadvantaged portion of the DWSRF. However, in order to fund the disadvantaged communities portion of the DWSRF, the TWDB is required to obtain a source of funds for the match. The reduction of general revenue to match disadvantaged DWSRF will not affect the overall amount of federal funding; however, it will impact the ability to allow maximum utilization of the disadvantaged communities program.

Administrative and Support Costs

DESCRIPTION / JUSTIFICATION:

The 71st legislative session (1989) created the Economically Distressed Areas Program (EDAP) to provide financial assistance in the form of grants and loans for water and wastewater services to economically distressed areas in affected counties. The program includes measures to prevent future substandard development, including the requirement that all grant or loan recipients' county or city adopt Model Subdivision Rules, as legally applicable. As of March 2006, the EDAP has funded 85 projects in 22 counties, totaling \$501,149,509. Approximately 265,107 residents previously without adequate service either have or will have water and/or wastewater service directly because of these projects. The EDAP was initially funded in 1989 and 1991 with \$250 million in general obligation bonds and from 1993 through 1998, by \$300 million in EPA grant dollars. The majority of this funding has been committed to the 85 projects that are either completed or are currently in design/construction.

Currently, a limited amount of design/construction funds are available that will primarily be utilized for cost increases to existing projects. \$12,010,917 remains of the \$250 million in bond authorization. We are requesting that the Legislature grant TWDB appropriation authority to pay the debt service on issuance of the final \$12 million. It is anticipated that 2 new EDAP projects could be funded.

EXTERNAL/INTERNAL FACTORS:

4.A. EXCEPTIONAL ITEM REQUEST SCHEDULE

80th Regular Session, Agency Submission, Version 1

Automated Budget and Evaluation System of Texas (ABEST)

Agency code: 58A Agency name: Debt Service Payments - Non-Self Supporting G.O. Water Bonds DESCRIPTION Excp 2008 Excp 2009 CODE Item Name: State Participation **Item Priority:** 2 Includes Funding for the Following Strategy or Strategies: 01-01-02 General Obligation Bond Debt Service Payments for State Participation **OBJECTS OF EXPENSE:** 2008 DEBT SERVICE 1,375,000 2,875,000 \$1.375.000 \$2,875,000 TOTAL, OBJECT OF EXPENSE **METHOD OF FINANCING:** GENERAL REVENUE FUND 1,375,000 2,875,000 TOTAL, METHOD OF FINANCING \$1,375,000 \$2,875,000

DESCRIPTION / JUSTIFICATION:

The State Participation Program was created by the Texas Constitution to facilitate the construction of optimally-sized regional water supply, wastewater, or flood control projects. Frequently, local interests lack sufficient customer base to afford the excess capacity to build an optimally-sized regional facility at the time implementation of the project needs to begin. In order to provide assistance, TWDB sells general obligation bonds and uses the proceeds to purchase an ownership interest in the excess capacity of a facility. TWDB uses the state appropriations to offset TWDB's debt until the program becomes self-sustaining. The project participants' repayments are initially deferred. Then, as the population of the project's service area grows, project participants begin progressively purchasing TWDB's ownership interest based on an agreed schedule. When TWDB is made whole with respect to its original investment, ownership of the project passes completely to the project participants.

Each biennium the legislature authorizes the amount of bonds that can be issued for State Participation projects, and it appropriates the amount of general revenue needed to pay the debt service on the bonds. As financial assistance needs are identified for specific projects recommended through the State and Regional Water Planning process, additional funding might be necessary to implement large-scale regional projects. Several entities have expressed interest in pursuing state participation projects if the funding were available.

Legislative authorization is requested to issue up to \$50 million in general obligation bonds in the FY2008-2009 biennium for State Participation projects with additional legislative appropriations of approximately \$4.25 million in the FY2008-2009 biennium for payment of debt service.

2008 DEBT SERVICE	1,100,275	9,175,025
TOTAL, OBJECT OF EXPENSE	\$1,100,275	\$9,175,025
METHOD OF FINANCING:		
1 GENERAL REVENUE FUND	1,100,275	9,175,025

DESCRIPTION / JUSTIFICATION:

The Brownsville Public Utility Board(BPUB) plans to initiate design and construction of a 25 million gallon per day demonstration seawater desalination plant within the 2008-09 biennium. The proposed project is part of the State of Texas initiative to develop abundant, drought-proof water supply sources through modern seawater desalination technologies. In a 2004 feasibility study, the BPUB determined that it would require financial assistance to implement the full-scale project. Absent a state or federal appropriation to fund the project, the State Participation program is the more competitive TWDB alternative to assist BPUB in its effort to develop the large-scale project. The project will include raw seawater intake, transmission to water treatment plant, screening, pre-treatment, reverse osmosis membrane treatment, storage, transmission of treated water to BPUB distribution system, transmission of brine waste stream for disposal. BPUB would require \$20 million in financing for FY08 to be utilized for design, permitting and environmental clearances, and \$145 million in FY09 for construction of the project along with construction phase engineering services.

Legislative authorization is requested to issue up to \$165 million in general obligation bonds for the BPUB's project, and legislative appropriations of approximately \$10.3 million for the FY08-09 biennium for payment of debt service.
