Department of the Interior, Geological Survey

June 1942

DONLEY COUNTY, TEXAS

This publication contains records of 264 wells and seismograph test holes, and 17 springs, drillers' logs of 99 wells and seismograph test holes, logs of 31 test wells drilled by W. P. A. labor, and the results of chemical analyses of water from 72 wells and springs in Donley County, Texas. Most of the records were collected from February 14, to June 14, 1941 by Wayne G. Christian, project superintendent for the Work Projects Administration Project No. 17572. This project was sponsored by the Texas State Board of Water Engineers in cooperation with the United States Department of the Interior, Geological Survey. In May 1942 W. H. Alexander, Jr., of the Federal Geological Survey, collected records of 48 of the wells. The drillers' logs of the seismograph test holes given in this report were furnished by The Texas Company and the Phillips Petroleum Company.

The analyses were made by chemists employed on Work Projects Administration Project No. 17276 under the direction of Dr. E. P. Schoch, Director of the Bureau of Industrial Chemistry, The University of Texas, and W. W. Hastings, Chemist of the Quality of Water Division of the Federal Geological Survey. The results of all of the analyses are tabulated in parts per million and 24 of them are also given in milligram equivalents per liter for the convenience of those who prefer this form of expressing the quality of water.

The records serve as a guide to land owners, well drillers and others who need information regarding wells, the depth to ground water in different parts of the county, and the quality and chemical character of water yielded by the wells. They provide useful information for more detailed investigations that are being made in many parts of Texas by the Texas State Board of Water Engineers in cooperation with the Federal Geological Survey.

A limited number of copies of this release are available for free distribution. They may be obtained by addressing a request to Mr. C. S. Clark, Chairman, Texas State Board of Water Engineers, 302 West 15th Street, Austin, Texas.

This release was mimeographed by employees of the Work Projects Administration Project No. 17276.

Records of wells and springs in Donley County, Texas
All wells are drilled unless otherwise stated in remarks

a/ Plus (+) indicates water level is above ground.

b/ T, turbine; A, air, steam or natural gas lift; H, hand pump or bucket and rope; C, cylinder; G, gasoline; E, electric; W, windmill. Number indicates horsepower.

Chemical analyses of water from some of these wells and springs are shown in a table of analyses on pages 41 to 44

311	127.95	do.	C,W	S	
313	--	--	--	--	Seismograph test hole. See log.

c/ P, public supply; D, domestic; S, stock; Ind, industrial; N, not used.
d/ Water level reported by driller or owner.

Table of drillers' logs of wells in Donley County, Texas

	Thickness (feet)	Depth (feet)
<u>Well 45</u>		
Gentle slope. O. Caraway, 8 $\frac{1}{4}$ miles northwest of Clarendon. The Texas Company, driller.		
Sand	5	5
Clay	52	57
Unknown	3	60
Sandy clay	105	165

	Thickness (feet)	Depth (feet)
<u>Well 49</u>		
Gentle slope. Mrs. Anna Hatchett, 5 $\frac{1}{2}$ miles northwest of Clarendon. The Texas Company, driller.		
Surface	5	5
Sandy clay	35	40
Sand and gravel	55	95
Sandy clay	65	160

	Thickness (feet)	Depth (feet)
<u>Well 56</u>		
Gentle slope. Bennett and Sims, 2 $\frac{1}{2}$ miles northwest of Clarendon. Phillips Petroleum Company, driller.		
Sand	17	17
Caliche and sandstone	55	72
Sand	9	81
Gravel	25	106
Unknown	3	109
Red shale	53	162

	Thickness (feet)	Depth (feet)
<u>Well 57</u>		
Gentle slope. Bennett and Sims, 2 $\frac{3}{4}$ miles northwest of Clarendon. Phillips Petroleum Company, driller. Elevation, 2,705 feet.		
Surface soil	10	10
Sand and gravel	35	45
White caliche	20	65
Sandstone	45	110
Hard conglomerate	18	128
Pink clay	10	138
Hard anhydrite	2	140
Red shale	60	200

	Thickness (feet)	Depth (feet)
<u>Well 58</u>		
Gentle slope. Bennett and Sims, 2 $\frac{3}{4}$ miles northwest of Clarendon. Phillips Petroleum Company, driller. Elevation, 2,723 feet.		
Surface soil	5	5
Soft sandstone	15	20
Sand	15	35
Rocks and gravel	5	40
Sandstone	5	45
Caliche and sandstone	50	95
Sand and gravel	30	125

<u>Well 168</u>		
Flat east of small creek, Miss Moody Kennedy, $8\frac{1}{2}$ miles southeast of Clarendon.		
Top soil, some clay	1	1
Gray sand, some clay	5	6
Blue-gray sand	2	8
Gray clay	4	12
Red sandy clay	1	13
Brown sand, some clay	4	17
Brown sand	4	21
White sandy clay	1	22
Light-brown coarse-grained sand	2	24
Struck water at 3 feet. Water level, 2.80 feet below land surface, 20 hours after hole completed. April 5, 1941.		

	Thickness (feet)	Depth (feet)
<u>Well 237</u>		
Sandy hills, side of county road, $6\frac{1}{2}$ miles north of Hedley.		
Sandy top soil	1	1
Coarse-grained sand	2	3
Sandy clay	3	6
Fine-grained sand, some volcanic ash	3	9
White fine-grained sand	5	14
Silt and sand	4	18
White fine-grained sand	2	20
Yellow fine-grained sand	13	33
(Continued on next page)		

Logs of test wells drilled by W. P. A. labor in Donley County--Continued

	Thickness (feet)	Depth (feet)
<u>Well 237--Continued</u>		
Volcanic ash	4	37
Coarse-grained sand and gravel	8	45
Light-gray clay	10	55
Light-brown fine-grained sand	5	58
Struck water at 56.0 feet. April 25, 1941.		

<u>Well 241</u>		
Rolling sand hills, side of county road, $4\frac{3}{4}$ miles north of Hedley.		
Sandy top soil	6	6
Dark-brown sandy clay	2	8
Brown sand	12	20
Brown coarse-grained sand, some clay	6	26
Red coarse-grained sand	6	32
Brown fine-grained sand, some gravel	5	37
White coarse-grained sand, some gravel	5	42
Light-brown fine-grained sand, some clay	2	44
White coarse-grained sand, some gravel	5	49
White fine-grained sand	17	66
Brown fine-grained sand and silt, some gravel	8	74
White medium-grained sand	4	78
May 12, 1941.		

<u>Well 243</u>		
Rolling sand hills, side of county road, 5 miles north of Hedley.		
Sandy top soil	4	4
Brown sandy loam	4	8
Brown sand, some clay	3	11
Light reddish-brown sand	20	31
Brown medium-grained sand, some clay	14	45
Light-brown fine-grained sand, some clay	2	47
Yellow coarse-grained sand and gravel	3	50
May 13, 1941.		

<u>Well 245</u>		
Sandy hills, side of county road, 5 miles northeast of Hedley.		

	Thickness (feet)	Depth (feet)
<u>Well 245--Continued</u>		
Brown sand, some clay	5	3
Gray sand, silt	6	9
Brown clay	3	12
Light-brown sand, some clay	1	13
Brown sand	23	36
White fine-grained sand	5	41
Brown sand and clay	30	71
Light-brown clay, some sand	9	80
Light-brown sand, some clay	2	82
Fine-grained sand, some clay	13	95
Coarse-grained sand and gravel	5	100
May 13, 1941.		

<u>Well 251</u>		
Gentle slope, side of county road, 8 miles northeast of Hedley		
Sandy top soil	4	4
Light-brown sand, some gravel	5	9
Brown sandy clay	1	10
White fine-grained sand	9	19
Yellow coarse-grained sand	1	20
White fine-grained sand	1	21
Brown coarse-grained sand	9	30
May 26, 1941.		

<u>Well 260</u>		
Slightly rolling sand hills, side of county road, $5\frac{1}{4}$ miles northeast of Hedley		
Gray sand, some silt	2	2
Reddish-brown sand, some clay	5	7
Red medium-grained sand	6	13
Reddish-colored sand, some clay	10	23
Light-brown sand	10	33
Light-brown sandy clay	9	42
Light-brown clay, some sand	1	43
Yellow clay	2	45
Yellow fine-grained sand and silt	2	47
Yellow clay, some sand	16	63
Yellow fine-grained sand	5	68
May 13, 1941.		

Logs of test wells drilled by W. P. A. labor in Donley County--Continued

	Thickness (feet)	Depth (feet)
<u>Well 299</u>		
Rolling, side of county road, $5\frac{1}{4}$ miles southeast of Hedley.		
Sandy top soil	2	2
Sand and caliche, some gravel and clay	3	5
Brown coarse-grained sand	5	10
Gravel, sand and caliche	12	22
Light-brown sand, clay nodules	10	32
Struck water at 27 feet. April 9, 1941.		

	Thickness (feet)	Depth (feet)
<u>Well 301</u>		
Gentle slope, side of county road, 6 miles southeast of Hedley.		
Sandy top soil, caliche and gravel	3	3
White fine-grained sand	6	9
Coarse-grained sand, gravel and caliche	3	12
Struck water at 11 feet. April 10, 1941.		

	Thickness (feet)	Depth (feet)
<u>Well 309</u>		
Gentle slope, side of county road, $7\frac{1}{4}$ miles southeast of Hedley.		
Brown sandy clay	15	15

	Thickness (feet)	Depth (feet)
<u>Well 309--Continued</u>		
Brown fine-grained sand	9	24
Brown clay	14	38
Brown fine-grained sand and clay	9	47
Struck water at 30.50 feet. Water level, 30.40 feet below land surface, 5 hours after hole completed. April 15, 1941.		

	Thickness (feet)	Depth (feet)
<u>Well 312</u>		
Flat, side of county road, 9 miles southeast of Hedley.		
Sandy top soil	2	2
Brown fine-grained sand and silt, some gravel	7	9
Light-brown clay	4	13
Light-tan sandy clay	2	15
Brown sandy clay and caliche	2	17
Brown fine-grained sand, some clay	6	23
Brown clay	2	25
Brown fine-grained sand	5	30
Yellow sand	4	34
Brown fine-grained sand and silt	2	36
Red fine-grained sand, some clay	24	60
April 15, 1941.		

Partial analyses of water from wells and springs in Donley County, Texas

Analyzed at The University of Texas under the direction of E. W. Lohr and W. W. Hastings, Chemists, U. S. Department of the Interior, Geological Survey, and Dr. E. P. Schoch, Director of the Bureau of Industrial Chemistry. Results are in parts per million. Well numbers correspond to numbers in table of well records.

Well c/	Owner	Depth of well (ft.)	Date of collection	Total dissolved solids (sum)	Cal- cium (Ca)	Magne- sium (Mg)	Sodium and Potassium (Na + K) (calc.)	Bicar- bonate (HCO ₃)	Sul- phate (SO ₄)	Chlo- ride (Cl)	Fluor- ide (F)	Ni- trate (NO ₃)	Total hardness as CaCO ₃ (calc.)
