C. S. Clark, Chairman
John W. Pritchett, Member
E. V. Spence, Member

FLOYD COUNTY, TEXAS

Records of wells, drillers' logs, water analyses,
and map showing locations of wells

Prepared in cooperation with the United States
Department of the Interior, Geological Survey

April, 1946

FLOYD COUNTY, TEXAS

By

C. R. Follett and John H. Dante

April 1946

INTRODUCTION

This publication giving the results of water well surveys in Floyd County to December 1945 is the second such report relating to the county, the first being released on June 30, 1938. This report was prepared in cooperation between the Texas Board of Water Engineers and U. S. Department of the Interior, Geological Survey. It contains records of 623 wells and springs, drillers' logs of 111 wells, chemical analyses of water from 90 wells and springs and results of periodic water-level measurements in 43 observation wells. It also includes a map showing the location of all wells and springs recorded in the tables. Each well or spring is given a number on the map corresponding to the number assigned to it in the records.

About 60 percent of the records were obtained in 1937-38 by W. L. Broadhurst, Joe W. Lang and G. H. Shafer, a part were obtained by W. L. Broadhurst, and W. H. Alexander, Jr., between 1938 and 1944, and the remainder were obtained and many of the earlier records were brought up-to-date by the writers during September, October and November 1945.

Included in the table of well records is the following information: well number, location and depth of well, names of owner and driller, length and size of casing, depth to the water level on given dates, method of lift and use of water. In the "remarks" column the items of information include the diameter of the pump column, depth of pump setting, yield of pump, in gallons a minute, the drawdown during pumping, and the number of acres irrigated.

The water analyses were made under the supervision of E. W. Lohr or W. W. Hastings, Chemists of the Quality of Water Division of the Federal Geological Survey and Dr. E. P. Schuch, Director of the Bureau of Industrial Chemistry of The University of Texas. The results of the analyses relate only to the mineral constituents in the water and not to its sanitary character.

Grateful acknowledgment is due to the owners of wells and pumping plants in Floyd County who have given their cooperation in the collection of these data. The well drillers and representatives of pump companies also have contributed freely of their information.

A limited number of copies of this report are available for free distribution. They may be obtained by addressing a request to Mr. C. S. Clark, Chairman, Texas State Board of Water Engineers, 302 West 15th Street, Austin 14, Texas.

Records of wells and springs in Floyd County, Texas
All wells are drilled unless noted in the remarks column

| Well | Distance from Lockney | Owner | Driller | Date com- pleted | Depth of well (ft.) | Diam- eter of well (in.) | Height of measuring point above ground (ft.) |
|------|-----------------------|---------------------|---------------------|------------------|---------------------|--------------------------|--|

a/ Measuring point was usually top of casing, top of pipe clamp, or top of pump base or foundation.

b/ Method of lift: T, turbine; C, cylinder; E, electric; G, gasoline, natural gas, butane or oil engine; W, windmill. Number indicates horsepower.

Chemical analyses of water from most of these wells and springs are given in the table of analyses

| Well | WATER Below land surface (ft.) | LEVEL | | Method of lift b/ | Use of water c/ | Remarks |
|------|--|--------------------------------|------------|----------------------------|--|---------|

Partial analyses of water from wells and springs in Floyd County, Texas

Analyzed at The University of Texas under the direction of F. W. Lohr and W. W. Hastings, Chemists, U. S. Department of the Interior, Geological Survey, and Dr. E. P. Schoch, Director of the Bureau of Industrial Chemistry. Results are in parts per million. Well numbers correspond to numbers in table of well records.

| Well | Owner | Depth of well (ft.) | Date of collection | Total dissolved solids | Cal-cium (Ca) | Magne-sium (Mg) | Sodium and Potassium (Na+K) (calc.) | Bicar-bonate (HCO ₃) | Sul-fate (SO ₄) | Chlo-ride (Cl) | Fluor-ide (F) | Ni-trate (NO ₃) | Total hardness as CaCO ₃ (calc.) |
