

- EXPLANATION**
- Well used for control
 - Top number indicates approximate total thickness of the Carrizo Aquifer
 - Bottom number indicates approximate net sand thickness of the Carrizo Aquifer
 - 700 — Line showing approximate net sand thickness of the Carrizo aquifer. Dashed where control is absent or limited. Interval is 50 feet
 - Ec. Outcrop of the Carrizo Sand
 - Contact
 - Dotted where concealed or approximately located
 - Fault, dashed where approximately located
D, downthrown side; U, upthrown side
Only those faults in the outcrop are shown
 - ~ ~ ~ ~ ~ Approximate downip limit of fresh water (less than 1,000 milligrams per litre dissolved solids) in the Carrizo Aquifer
 - ~ ~ ~ ~ ~ Approximate downip limit of fresh to slightly saline water (less than 3,000 milligrams per liter dissolved solids) in the Carrizo aquifer

Figure 9
Approximate Total Thickness and Net Sand Thickness of the Carrizo Aquifer
